Ultra-slim design and technical precision

Deubl Alpha frames and partitions impress with their finesse. With profile widths of 23 mm to 50 mm, depending on the system concerned, they can be used to create the most elegant of constructions.

From the simple hinged door through to complex door systems, including those with free-standing elements – every task can be mastered with ease. A wide variety of decal strips create decorative highlights.

The Deubl Alpha portfolio is a perfect match for DORMA glass fittings. Each of the all-glass systems impresses in every detail.

Door frames and partition systems

Recognised for "Excellent Product Design" at the German Design Awards: Frames and frame systems for the most elegant of all-glass door systems and partitions.

Creative office environments

DeUBL TWS 2000 with EVO hydraulic hinge

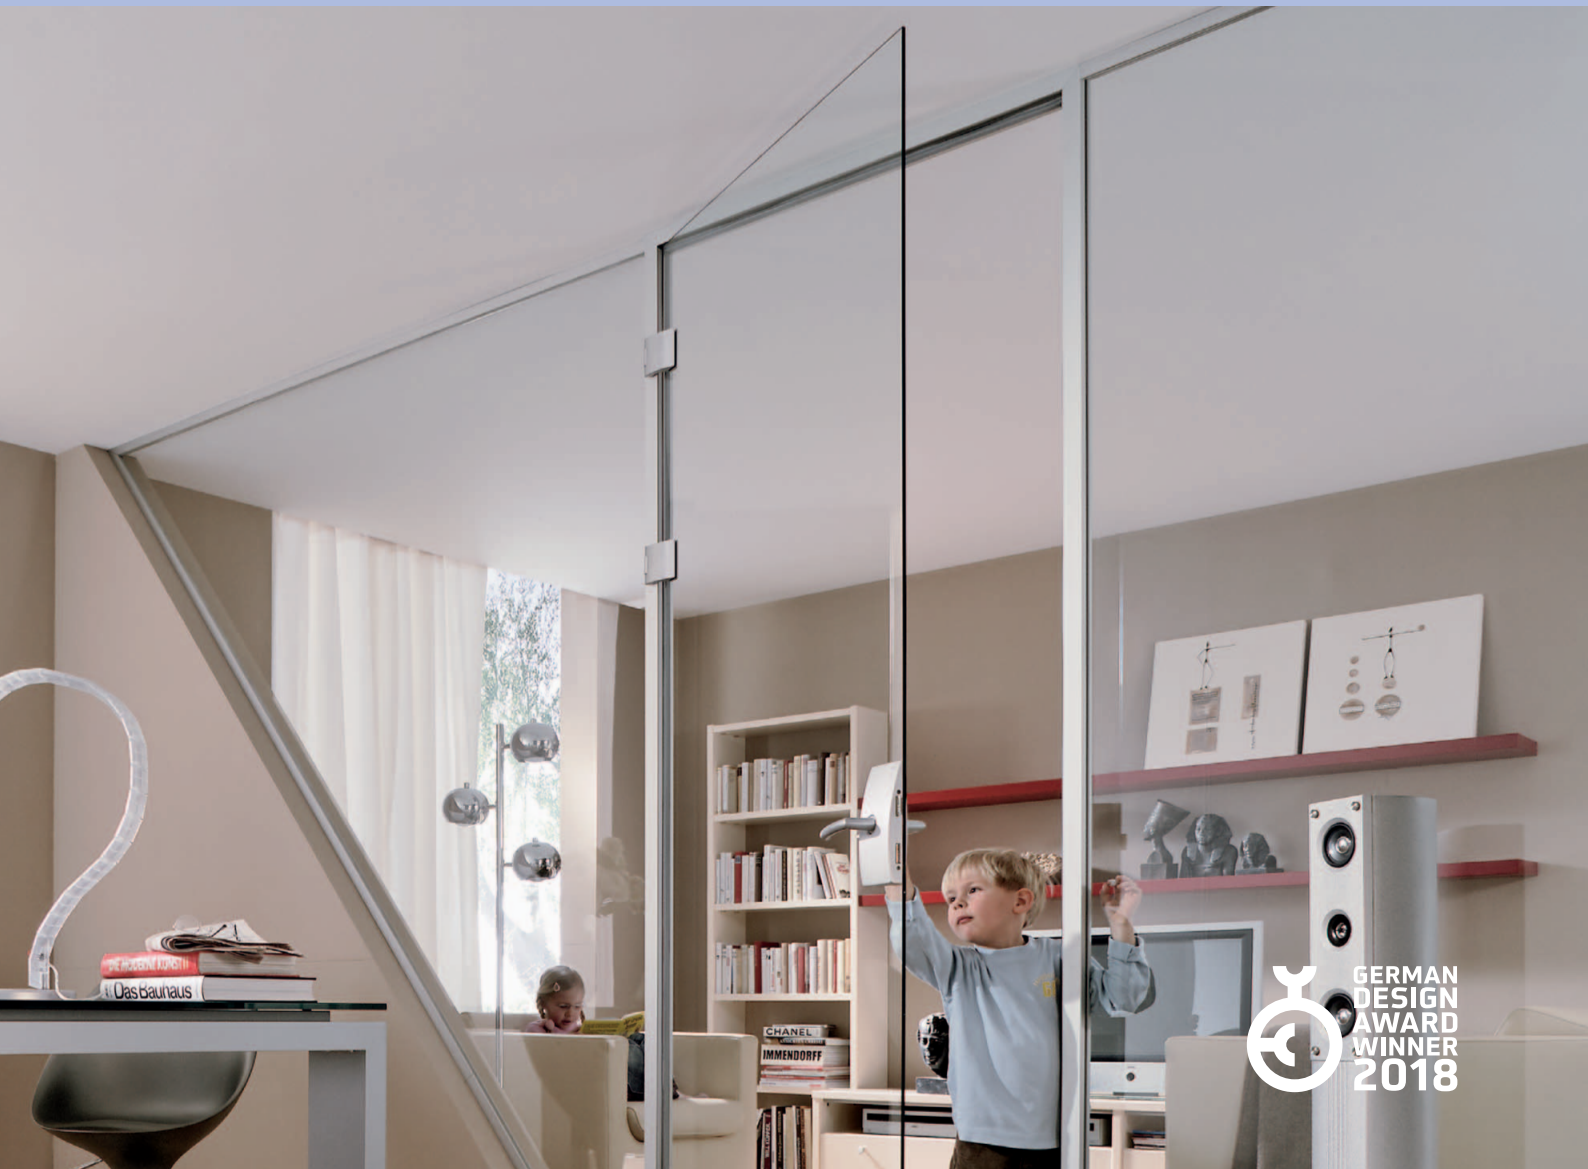

A modern hydraulic hinge replaces the usual floor or top door closer – the door system is threshold-free!

The TWS 1000 system combines AT 44 and PT 35 door frames with the MR 36 frame

Bespoke element construction for glazing with toughened glass.

Deubl TWS 2000 – partition system for all-glass systems with integrated frame

The elegant overall impression of the all-glass design is one of striking transparency. The glass panels can be butt joined using a silicone joint or tesa® ACX adhesive tape.

TWS 2000 with decorative bars, glued to the glass surfaces on both sides.

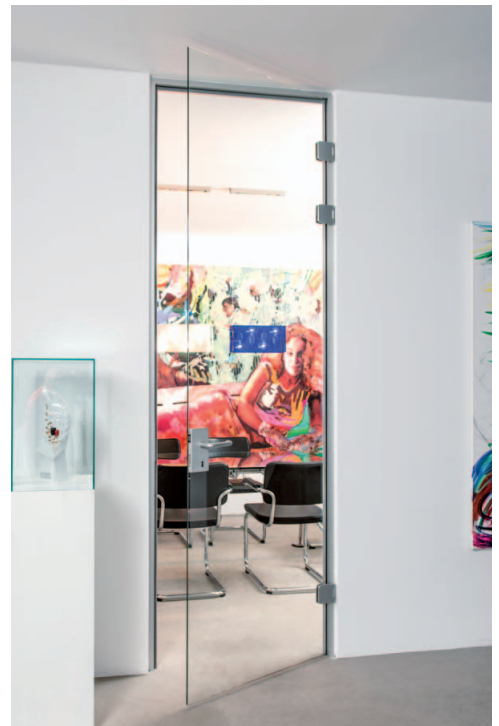

Modern room dividing

Whether all-glass systems, double-leafed or single-leafed doors – the perfect solution every time.

... with partitioning systems, single-action or swing doors.

Sliding door and hanging sliding door systems

An ultra-modern sliding door concept, flexible and convenient – with optimal mechanics thanks to self-closing door dampers.

Design and function

Sliding doors make the most beautiful wardrobes – with elegant cross bars, exquisite surfaces and integrated mirror.

Hanging sliding doors – with a threshold-free look

Sliding doors: clear and creative – for wood, mirrors, glass

The requirements placed on a modern system for interior design are becoming increasingly demanding. That is why Deubl Alpha has developed a new sliding door concept that displays greater flexibility than ever before in considering the demand

for design, comfort and economy. Bespoke production solves just about any kind of problem, even that of complex room layouts. And the clarity of the system components ensures that such individuality comes to you at a low cost.

Let your taste and desired functionality guide your decision for one of the versions.

The perfect wall unit becomes a showcase – individually according to your ideas.

The dream of a walk-in wardrobe – easy to fulfil with the HST system.

New!

New! Deubl shelf ALU 120

Deubl shelf ALU 100

Creative diversity, high load capacity, bespoke.

Deubl Alpha shelf systems create accents in rooms. In apartments, offices, shops and on fair stands. Clear-cut. Strong. Attractive.

On the one hand with the new aluminum wall board ALU 120 and the proven ALU 100 and ALU 220 in the finest workmanship.

Both product lines are extremely flexible and particularly exquisite thanks to their concealed mounting. Whether in the home or in shops, add the final touch to your furnishing!

Elegant shelf systems and consoles

Small design worlds – little effort and a great impact with Deubl ALU wall boards.

Simple and elegant

ALU 220 shelf system
in the office, shop or studio –
less is more.

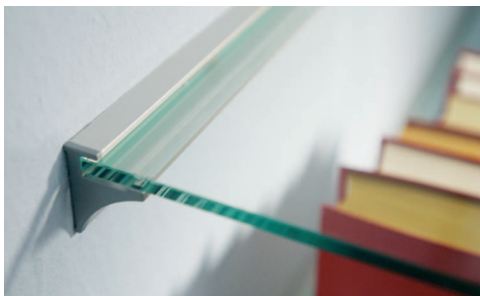

ALU 120 – simple, elegant
and practical. In the spirit of
modern room design

The extravagant touch for the entire ambience through the use of parsol glass, homely and cool at the same time.

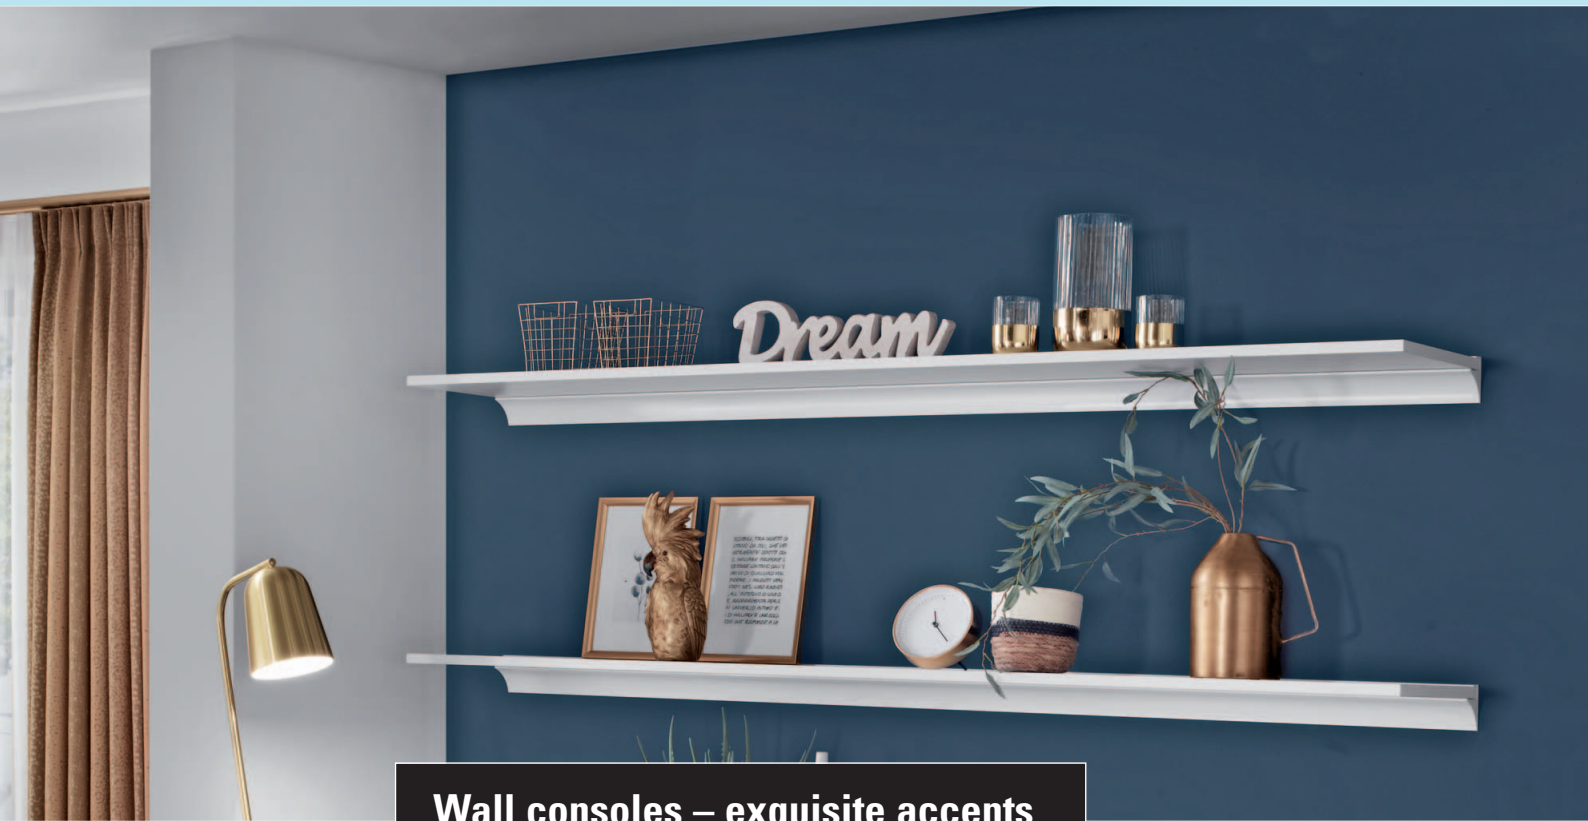

Horizontal beauty, almost hovering yet strong down to the last detail.

A utility surface becomes a decorative element – with straight, round or chamfered corners. Deubl Alpha glass consoles with concealed mounting stand out due to their elegance, beauty and bespoke manufacture. Also excellently suited as product stands for commercial applications. Matching end caps complete the stylish appearance of each console.

Available in four different dimensions with corresponding load capacity:

- GK 300 glass console for 6 mm glass
- GK 400 glass console for 8 mm glass
- GK 500 glass console for 10 mm glass
- HK 600 glass console for 16/19 mm glass and wood

Wall consoles – exquisite accents

... at home, in the office, in shops.

Kreatives Potenzial

Neu!

Simplicity and spatial harmony in its most exquisite form

The newly developed **Q-Classic modular furniture system** is based on highly stable square aluminum profiles in the dimensions 25, 40 and 50 mm, finished in five attractive standard surfaces. The system concept, which is simple in itself, offers enormous flexibility in furniture construction. Shelves with or without side walls, optionally with integrable cupboard and drawer elements.

Q-Classic furniture appears light and stylish in its precision, and it also impresses with its ruggedness. The CNC-supported production guarantees absolute individuality in the implementation of customer requests.

Standard surfaces Q-Classic:
Silver matt anodized, stainless steel design,
jet black matt RAL 9005, gray metallic
DB703 and white RAL 9016

Special surfaces:
powder-coated according to RAL

Q25 Classic 3-shelf with 4 levels, lighting: LEDs on all floors.

Q25 Classic sales shelf and sales counter with integrated 2-door cabinet, white (shelf and side surfaces mirrored)
