A brand of JELD-WEN

OPEN. TO.
DOORS THAT DELIGHT EVERY DAY.

OPEN. TO.

**AN ENTIRELY
NEW DOOR
EXPERIENCE.**

Open invitation: [DANA.at](https://dana.at)

Of course, a door by DANA is beautiful to look at. But that's not the only thing that defines who we are. Our ideas for doors go further, break new ground, make premium quality standard and have revolutionised more than just the opening and closing. The result: Not just beautiful, long-lasting doors, but also functions that really do make daily life better.

In this book of doors you'll discover outstanding innovations that you'll only find with DANA. OPEN. TO. A New Door Experience!

ANYTHING BUT CONVENTIONAL.

The wonderful world of DANA.

Now we could tell you that we're part of the international JELD-WEN group and make the most popular doors on the Austrian market. But what's far more important is what that means to you.

Over 45 years of experience and our principle of always imagining the next step for doors produce unique and unexpected results.

In the world of DANA, the extraordinary is standard and simply anything is possible – even meeting small, extremely likeable monsters!

Our DANAs not only resemble doors, they also stand for what DANA is all about: special ideas, enthusiasm and down-to-earth solutions. Let us take you to a completely new world of doors: A world that surprises you every day, not least with quality made in Austria!

More about the DANAs at [DANA.at](https://www.dana.at)

OPEN. TO.

A NEW DOOR EXPERIENCE.

What defines our doors is so much more than is apparent at first sight. The true advantage of a DANA door is revealed by its most important function: the opening and closing.

No two lives, no two homes are exactly the same – and that means that the demands made on a door are different too. At DANA, we've given this fact a great deal of thought. Because we realise that no two people use doors in precisely the same way:

Children charge through doors like whirlwinds, while we grown-ups weave our way through rooms laden with bags and suchlike. While safety and calm are priorities in some rooms, in others we want solutions that work very simply or save space.

Our aim has always been to create doors that are right for every room and every set of living conditions. And those who get to know our innovations quickly realise that we do this very successfully, time and time again.

In our book of doors we reveal to you what a door is really capable of. We want to surprise you. We'd like you to be enthusiastic. But there's one thing we'd like above all else: to make your daily life more attractive with our doors!

OPEN. TO.

- Smooth and easy to open – thanks to practical push handles
- Matching door designs in narrow corridors – with REVERSO
- More safety and comfort – with DANAmotion
- Save space on both sides opening doors – with SWING
- Closing at the touch of a button – with the electric lock
- Peace and noise insulation up to 35 dB – with SILENT+

OPEN. TO.

A pivotal door experience.

[DANA.AT/INSPIRATION](https://dana.at/inspiration)

”

Aren't doors fascinating? We can only guess what is hidden behind them, until we open them. They divide and yet they join. They protect and they hide. They open up new worlds where anything appears possible.

It is this fascination with the subject of doors that inspires us at DANA over and over again to create something special. We want to surprise you every day with our functions, designs and ideas. So that you see doors for what they are: something unique.

SOMETIMES NUMBERS SPEAK LOUDER THAN WORDS.

DANA – more than a door.

DAYS
of our lives are spent opening
and closing doors

4,954
YEARS'
experience of helping customers

480,000
DOORS PRODUCED
per year

356,720
TIMES
is how often a door is opened
or closed in its lifetime

15,000
HOURS
of development per year
(1,000 test certificates in total)

OPEN. TO. NEW NATURALNESS.

DANA – healthy living all along the line.

Every stage of the work DANA does is geared towards protecting the environment. And when we say “every”, we mean “every” – from car-sharing on the way to work to woods and varnishes we choose.

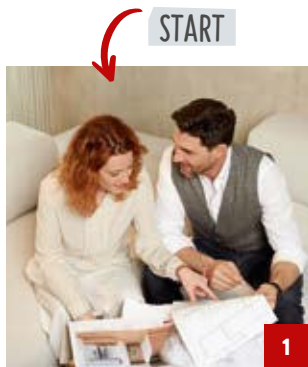

So what do you get out of it? A good feeling all round – and doors that genuinely contribute to a healthy atmosphere, indoors and out!

- Wood and wood materials **sourced from sustainable forestry**
- Traceable wood origin – awarded the **FSC®** and **PEFC™** certificates
- Use of **low emission products**
- **Environmentally friendly production** – from transportation to manufacturing
- **Efficient energy management** thanks to continuous monitoring
- **Healthy living environments** as confirmed by **Holzforschung Austria**
- **Made in Austria**
- Certified quality: **ISO 9001**

PLANNING FROM THE INSIDE OUTWARDS LETS YOU LIVE OUT YOUR IDEAS.

7 steps to a new door experience.

Start thinking about doors at the planning stage.

That's the golden rule for all house-builders! There are many questions that need asking right at the start so that every idea can be realised.

- Do you want your door to be an eye-catcher or to discreetly match the decor?
- Where is the hinge, how big is the swing angle?
- Which format should the door have? (e.g. ceiling height, double leaf etc.)

Know your style.

Ask yourself what style you want to characterise your home. That doesn't mean you can never stray from it, on the contrary. But a basic direction should be clear. More from page 48 onwards.

What style will you still want to be living with in ten years' time?

Take a look around where you're living now: What do you like, what do you not like so much?

Decide on a basic direction e.g. timeless.

Fall in love with the details.

You have the door handle or knob in your hand several times a day. So it not only needs to look good, but to feel great and suit the door! More from page 117 onwards.

- Do you prefer simple handles, recessed handles or push handles?
- Would you like custom-made designs? (e.g. flush, same design as the door etc.)

3

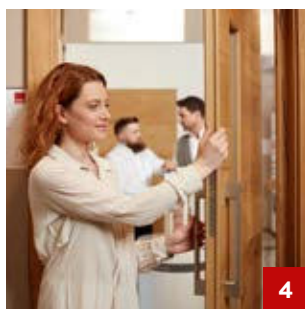

Let the effect of our doors sink in.

Most furnishing decisions are made instinctively, on the spur of the moment. That's why you should study our doors and see how they make you feel – ideally in our showrooms.

More on page 138 and at dana.at/schauraum

- Need **comprehensive guidance**? No problem! Arrange an **appointment** with our sales team today – **you can do it online!**
- Need time & quiet**? No problem either – with a VIP card you can visit our showrooms whenever you wish.

Arrange
appointment
online
dana.at/schauraum

4

The right door for every room.

While safety and calm are priorities in some rooms, in others we want solutions that work very simply or save space.

- Who is going to use the door and how should it open?** (e.g. swing, slide)
- Would you like **particular functions**? (e.g. SILENT+, humidity protection etc.)

YOUR PRACTICAL DOOR CHECKLIST

available at dana.at/tuerencheckliste

Give your door the most attractive frame.

Like a picture frame, the door frame contributes to the overall impression your DANA door makes. That's why we have a frame to suit every model – from page 130 onwards.

- Should the **frame determine the door design**?
- Should the door, wall and casing be flush or on different levels?

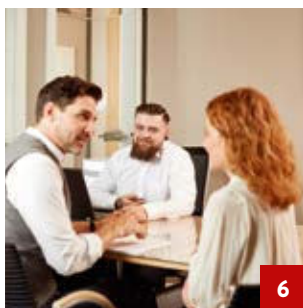

5

Prepare yourself for a surprise!

This is probably the most enjoyable part:
Because at DANA you experience innovations that no other door offers. More from page 16 onwards.

- Discover **DANAmotion** for soft opening and closing, the space-saving wonder **SWING**, our clever **smartClose System** and much more!

6

OPEN. TO.

**DOORS THAT
DELIGHT US AFRESH
EVERY DAY.**

Open invitation: [DANA.at](https://www.dana.com)

There are doors that are an attractive way of connecting two rooms. But we want more! We want solutions that amaze you, that add even more convenience to your daily life, that treat you to premium quality and comfort. That's why we have taken our doors to the next level and have come up with innovations that are unique and "unmistakably DANA".

The next pages could change how you see doors and dramatically increase your demands. And to be perfectly open with you, that's precisely what we intend.

DANAMOTION

No slammed doors, no danger.
For details, see p. 21

KONTEXT

Simple, no frills and flush-fitting.
More details on p. 27

SWING

The space-saving door.
More details on p. 25

SMARTCLOSE, PROTECT+ PACKAGE

Quite simply more comfort.
Find out more on p. 23 and p. 37

INSIDE DOUBLE-LEAF GLASS SLIDING DOOR

For endless free space.
More on Inside on p. 31

INTERIOR

The door with no casing.
More details on p. 28

BECAUSE YOU CAN NEVER HAVE TOO MANY ADVANTAGES:

TWIN HINGES

Material and design quality
at standard prices on p. 35

FLATFIX HANDLES

Stripped-down handles with
a modern design on p. 32

DOOR THICKNESS PLUS

The standard for even more
durable doors on p. 20

STRONG EDGE

The powerful
quality advantage on p. 38

LIVING WITH DANA.

ELECTRIC LOCK, REVERSO

SILENT+ PACKAGE

Brings peace to the home.
All advantages on p. 36

NIVELO

Flush-mounting, done with glass
More details on p. 30

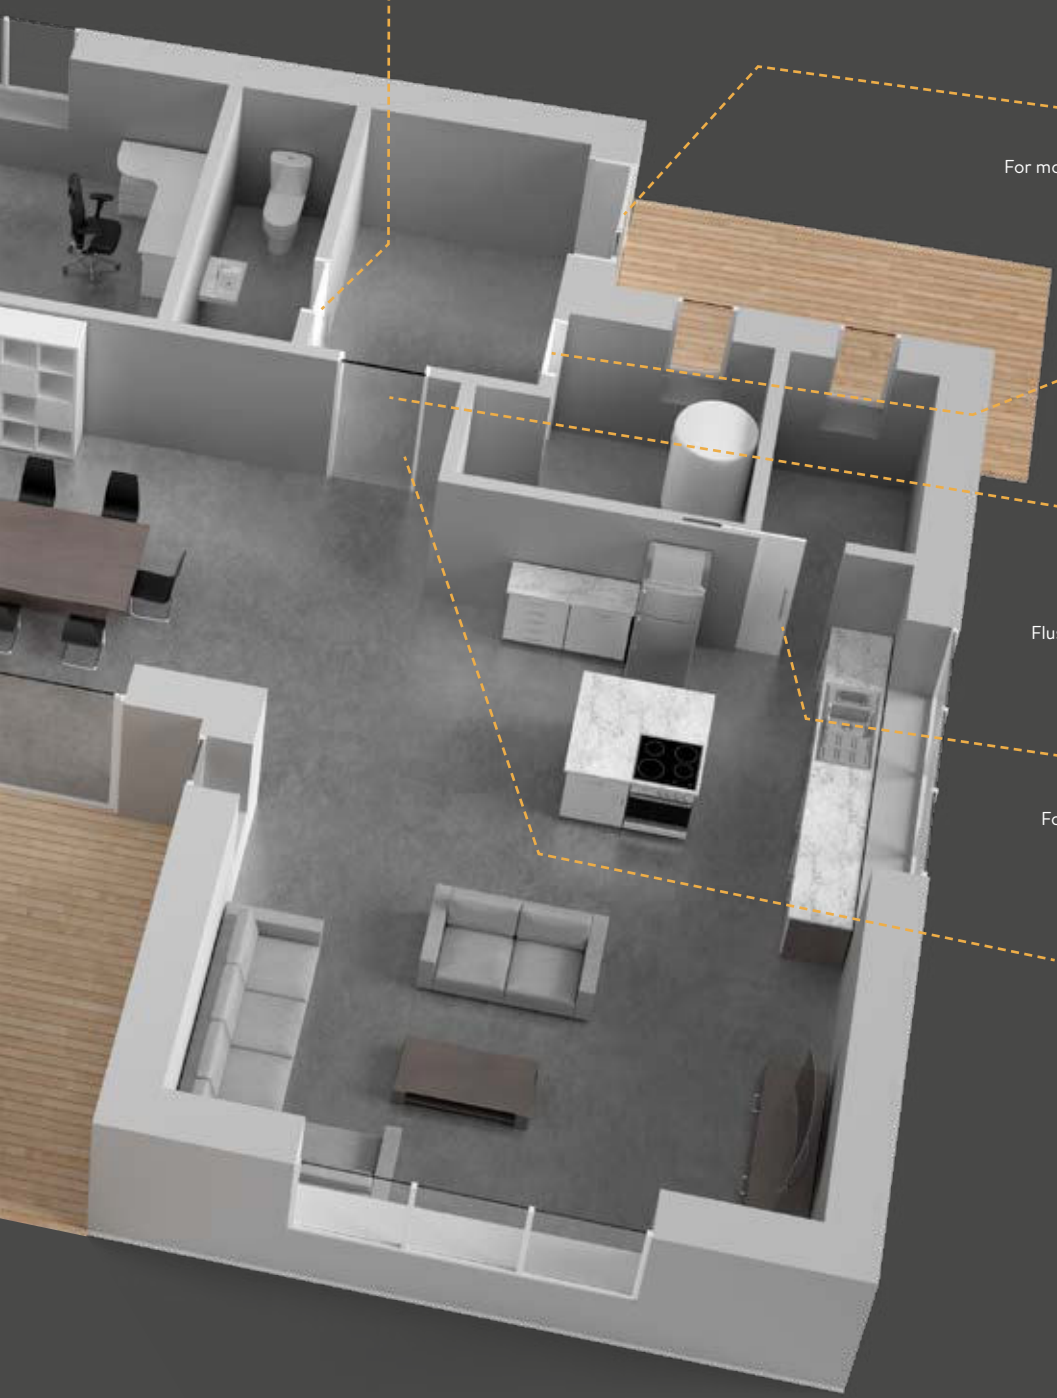

INSIDE SLIDING DOOR

For more on boundless free space, see p. 31

DANAMOTION EASY

Transparently more safety.
All advantages on p. 22

[DANA.AT/INNOVATIONEN](https://dana.at/innovationen)

MODUS 4 white matt

DANA

42
mm

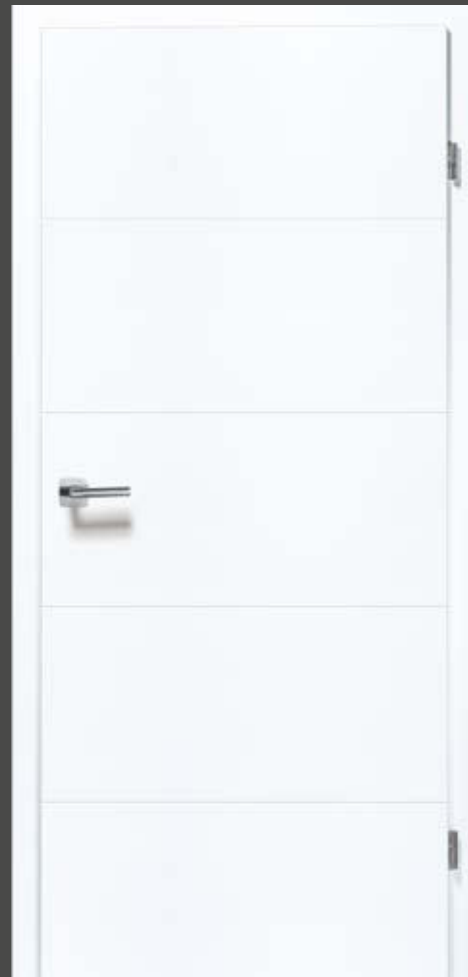

DOOR THICKNESS PLUS

Even longer-life and sturdier doors – as standard!

Our Door thickness Plus makes premium quality standard: The door leaf of every DANA door is 42 mm thick – that's nearly 10% thicker than usual in the trade. What's more, a four-sided solid wood frame increases the quality and strength of your doors further still – at no extra cost!

- Even greater **stability** thanks to the high-quality, four-sided solid spruce frame
- Even **more durable** doors: even more inherent stability
- Even more closing comfort: the door closes **flush and evenly**
- 42 mm door leaf thickness as premium standard

dana.at/tuerenstaerke-plus

APART country oak

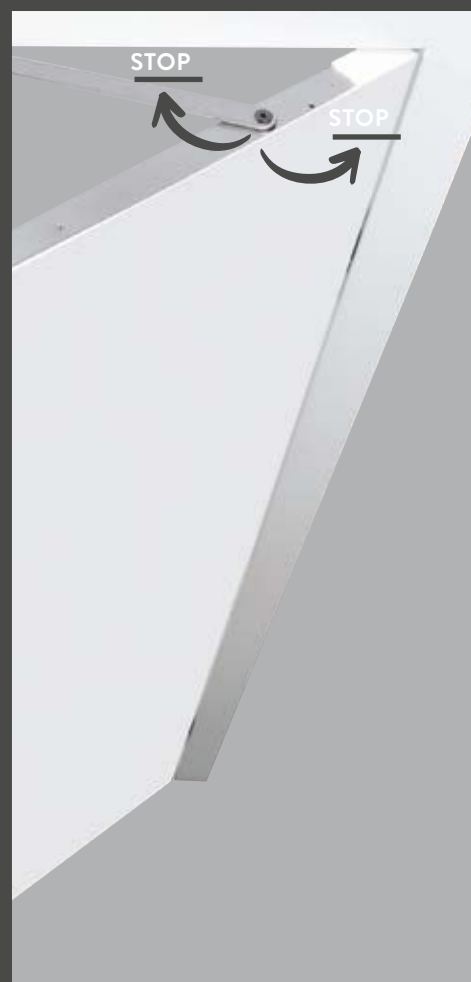

DANAMOTION

No slammed doors, no danger.

Sometimes powerful innovations are also very gentle: With DANAmotion, slammed doors, danger from doors bursting open uncontrollably and doorstops are things of the past:

- Automatic, smooth **stopping when opening**
- **Automatic soft closing**
- Stops at a preset opening angle (variable from 90° to 105°)
- The door also stays completely closed without a lock – for a particularly elegant look
- If desired, lockable with a push-button electric lock or chip card

dana.at/danamotion

Float all-glass door

ALL-GLASS
SOFT-SHUT DOOR.

DANAMOTION EASY

More safety for all-glass doors.

DANA presents DANAmotion Easy, the impressive innovation for especially elegant all-glass doors: no more slammed or swinging doors; the dangers of doors flying open uncontrollably are now a thing of the past.

- **No slamming** of all-glass doors
- No uncontrolled flying open of doors
- **No doorstop** needed
- Automatic, slightly **cushioned stopping** when opening
- Automatic, slightly cushioned closing
- Stops at a preset opening angle (variable from 90° to 110°)
- Can be combined with GT-Kontext Standard and every other door in the Kontext range (see p. 27)

dana.at/danamotion-easy

SMARTCLOSE

keeps the door shut –
without a conventional lock.

MODUS 4

SMARTCLOSE

The smart way to close a door.

DANA smartClose **cushions the door** when it is closed and keeps it shut. This automatic shutting mechanism means **locks and conventional handles are no longer needed**. So you have even more scope with your designs and can, for example, choose elegant push or recessed handles.

- Stays shut even without a latch – for example with a push or recessed handle
- Gentle closing like that of kitchen drawers
- Extremely unobtrusive: the system is almost invisible once installed
- More design flexibility when choosing a handle because no lock is necessary
- On all-glass doors the holding mechanism is concealed behind an elegant covering strip
- If desired, lockable with a push-button electric lock or chip card

dana.at/smartclose

EUROBA white matt

Reduction designed hinges,
VIRTUALLY INVISIBLE.

P-MOTION VB

Swings and stops gently in both directions.

The new swing door corner hinge for solid doors (VB) features impressive convenience and design. Thanks to the discreet design of the P-Motion system, the visual appearance of the door remains virtually unchanged. The hydraulic damping gently brakes the door when closing to prevent the oscillation that occurs with conventional swing doors.

- Door can **remain open** at an angle of **90°** in either direction
- **Adjustable hydraulic damping** gently brakes the door in both directions when closing
- **No oscillation**
- Swing doors that are far more convenient than before
- The hinges are **almost invisible** when the door is closed, and are discreetly in the background when the door is open
- Mountings are also available for underfloor heating

dana.at/pmotion

**IN-FLOOR
MOUNTING.**

SWINGS TO THE SIDE
when opened.

STRUKTURA
Cracked oak brown

SWING

Even more space to live in.

SWING doesn't just open, it swings to one side on the concealed rail. The door leaf reaches into both rooms. A real experience – and a real **space saver!**

- Especially space-saving: the door leaf can open into both rooms like a swing door
- More planning freedom thanks to the new door opening system
- Ideal wherever a **sliding door** is not feasible
- Cushioned closing
- **Can stand open in various positions**

dana.at/swing

STRUKTURA cracked ash Pura

A SURPRISING
way of opening.

REVERSO

Ideal for narrow reception areas.

Flush-fitting doors are ideally suited to a puristic interior design. Usually they open “inwards”, into the room – but this isn’t always appropriate, e.g. in narrow hallways. With REVERSO, you can now express your style everywhere: **opening into the passage, which takes up so much space, is avoided**; the room has a more harmonious feel.

- Elegant appearance: door leaf and casing are flush – as with conventional flush-mounted doors that open forwards
- Striking design and space-saving - the door leaf is not in the way
- The door surprisingly opens into the next room
- Depending on the model it can be fitted with the DANAmotion system for cushioned opening and closing
- Also available as all-glass door

dana.at/reverso

Door and wall in one colour

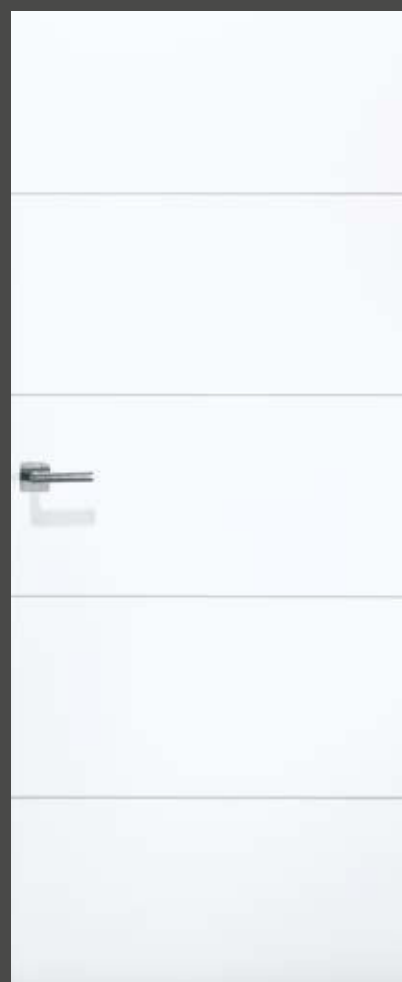

KONTEXT

Simple, no frills – yet so eye-catching.

KONTEXT really melts into the wall: **no casing, no hinges** are visible. This is not just modern and aesthetically pleasing – it also makes cleaning easier since no dust can gather on the casing.

- If desired, completely flush-fitting and with recessed handle
- Can be painted or papered to match the design of the wall – but is also available in every door design
- Opens either inwards or outwards with the same appearance
- Optional DANAmotion Easy: softens opening & closing
- Also available as a ceiling-height version, as an all-glass door with glass cutout featuring selected types of glass, or as Charisma moulded glass door (from p. 92)
- With the same appearance, now also available with technical Kontext features burglary resistant, fire protection, soundproof and in the specified climate class

dana.at/kontext

STRUKTURA
Cracked oak brown

INTERIOR SYSTEM

The new freedom of door design.

Those who prefer flush, clear forms will love this DANA innovation: The casing is replaced with a panel frame that can be fitted either in front or in the middle of the wall space **as desired**. That means you can decide on the building site which version you prefer. If the frame is placed in the middle a new, reduced stylistic idiom is created.

- **Flush-mounting** in a new form: nothing protrudes into the room any more – no handle, no knob
- Even more flexibility: You decide where the frame should be fitted
- With the DANA magnetic lock for soft and quiet closing
- The door and frame form one flush surface
- With concealed hinges
- With a recessed frame if required (page 133)
- Also available as an all-glass door or ceiling-height version

dana.at/interior

STRUKTURA knotted oak white oiled

CEILING-HEIGHT DOORS

The epitome of modern living.

Ceiling height door elements give rooms that certain something. That is why they are available from DANA for the entire range of doors. For special, eye-catching appearance, highlighted with features such as a transom, glass skylight or top panel.

- **Available for all door types and surfaces** - matching your style and design requirements
- **Design freedom:** flush with the surface, at one with the wall or with glass cut-outs
- Ceiling-height or extra-high doors create a **feeling of space** - even in small rooms
- Should ideally be **designed into the planning phase of the house**
- **Improved dimensional stability** thanks to the 4-sided standard solid wood frame made by DANA

CEILING HEIGHT DOORS ARE DREAMY.

Not only in large rooms!

GT Float – flush-mounted

NIVELO

Flush-mounting, done with glass.

Flush doors have become an essential part of modern interior design – and at DANA they are now also available in an all-glass version! **Door, casing and hinges merge** into a single unit making rooms look bigger, brighter and more inviting. This is the future of glass doors, available today at DANA.

- Brings the trend of a reduced stylistic idiom to the all-glass door
- Door leaf, hinge and casing are all flush
- A design highlight for expansive, bright living space
- **Soft and quiet closing** with an elegant closing system: a discreet magnetic strip, invisible when the door is closed, keeps the door shut
- With all the advantages of our all-glass doors – more details from page 106 onwards

dana.at/nivelo

DISAPPEARS
completely into the wall.

Mondria all-glass door

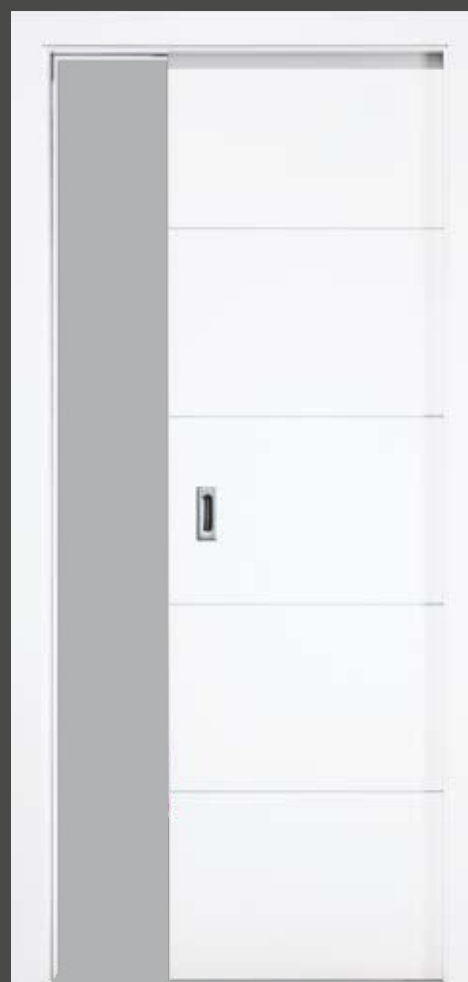

INSIDE

For endless free space.

A sliding door that **completely vanishes into the wall** when opened? DANA INSIDE makes it possible!

- Slides into the wall – door vanishes completely
- Simply pull the handle to slide out of the wall
- Maximum clearance width, more room to move
- With **DANAmotion System**
- Available in numerous designs
- Available as a solid door or all-glass door
- You will find more sliding door solutions from page 101 onwards

dana.at/inside

WAFFER THIN & UNIQUE

New: The flattest rosette on the market – only 0.8 mm

ELEGANTLY PURISTIC

in every detail: The most minimalist locking system on the market

FLATFIX Houston with pin lock

FLATFIX HANDLES

The ingenuity of simplicity.

"Less is more" – our FLATFIX handles underline this motto beautifully. We have taken the trend towards reduction to extremes: the wafer-thin, 0.8 mm stainless steel rosette lies **virtually flush** with the door leaf – and that on both sides.

- Elegantly smooth appearance, **not only ideal for flush-fitting doors**
- The following versions are possible:
 - With **key or keyless**
 - Keyless available with **pin code lock**: discreetly integrated in the rosette no more lost keys or exasperating searches
- Extremely **scratch-proof and durable**
- With round or rectangular rounded **stainless steel** rosettes or with **matt black** rectangular-rounded rosettes
- A **design highlight for the same price as a standard version**

All HANDLES

and locking mechanisms
from page 117 onwards.

dana.at/flatfix

The lock as a
DESIGN HIGHLIGHT.

Nizza push handle, inlay white
with integrated sensor for electric lock

ELECTRIC LOCK

And keys are no longer needed.

Many people find large key rosettes or escutcheon plates on doors unsightly. Nevertheless, there are rooms in homes you should be able to lock. Here, the DANA electric lock offers new possibilities: It locks the door at the touch of a button or by chip card.

- Particularly **easy to lock** – the touch of a button is all it takes
- Wider range of designs irrespective of stipulated, conventional handle sets
- **Almost invisible** mechanism
- Easy and secure access
- Fitted in the handle itself, as an unobtrusive lock button or with a chip card

dana.at/elektroschloss

ELEGANT LOOK &
SMOOTH CLOSING.

MAGNETIC LOCK

Closes gently.

Available with especially smooth closing – with the simple elegance of FLATFIX handles. The latch remains retracted while the door is open and then extends automatically thanks to the integrated magnets when the door closes. Discover the smoothest closing action.

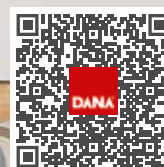

- Modern, smooth closing action
- Standard on flush-fitting doors
- More elegant appearance with grooved doors - optional
- More discreet strike plate
- **No wear on the strike plate in the frame** - wear-free
- Lock forend and strike plate in stainless steel
- Not possible to extend latch by mistake
- Easy to clean

dana.at/magnetfallenschloss

A DESIGN HIGHLIGHT
at no extra cost.

PALAIS white matt

TWIN HINGES

Elegance down to the smallest detail.

To lend your door support and ensure it moves flawlessly in the frame it is hung on hinges. For some people this is a tiny detail – at DANA it's a stylish eye-catcher: Thanks to our **high-quality twin hinges** in a stainless steel look!

- All hinges have the same look for a harmonious overall impression, for both standard and functional doors
- Tremendous flexibility: even after installation the door is **easy to adjust**
- Perfectly matches all fittings
- A fine design highlight with a **high-quality surface**

ALSO AVAILABLE
IN BLACK MATT.

DESIGN HINGE
as standard on all
grooved doors.

MODUS 4 white matt

SILENT+

For even more peace and comfort.

The DANA SILENT+ package is ideal for home areas where noise levels are higher – from the kids' playroom to the room with the clanking washing machine.

- **Noise insulation** up to 35 dB
- Adds calmness and harmony to the room
- With **sound-absorbing insert** and **drop-down seal**
- With a special seal in the frame
- **Improved dimensional stability** thanks to the reinforced door frame
- Almost every DANA door can **easily be modified** with the SILENT+ package
- Can also be combined with the PROTECT+ package (see page 37)

dana.at/twinband

SOUND-ABSORBING
INSERT.

DROP-DOWN SEAL.

STAYS STRONG –
thanks to the reinforced door frame.

DUAL 310 White matt

PROTECT+

For even greater stability.

The DANA PROTECT+ package is ideal for rooms in which humidity can temporarily increase, for instance the bathroom or utility room.

- Special solution for **temporary humidity increases**
- **Improved dimensional stability** thanks to the reinforced door frame
- **Coated bottom edge of the door leaf** – significantly better resistance to moisture absorption
- Almost every DANA door can **easily be modified** with the PROTECT+ package
- Can also be combined with the SILENT+ package (see page 36)

PROTECT+ BRINGS DURABILITY
– ideal for the bathroom

dana.at/protectplus

CHARISMA-DQ
Cracked oak brown float glass

SOLID 2 MM.

STRONG EDGE

Even tougher than before.

DANA doors are solidly built. Special attention is paid to high-quality door edge design. Where the door is subjected to the most stress, a strong edge of 2 mm solid wood is available in all standard types of wood for DANA veneer doors. The door then retains its beauty even during the toughest daily use.

- Even **stabler and more resistant to wear** when objects collide with it (e.g. vacuum cleaners, children's toys, etc.)
- The strong edge absorbs **the impact forces** and makes the door more resilient
- **Solid 2 mm** thick edge instead of the usual 0.6 mm
- **Standard on all doors in the Struktura series**
- Also available **for selected veneered doors** (not for opaque lacquered doors)

STRUKTURA knotted oak, white oiled

More than just a material: Veneer is a wonderful “effect material” that allows wood to be seen in a new light – again and again.

THE BEST OF WOOD.

Natural surfaces.

The history of wood veneer goes back thousands of years: The ancient Egyptians were already enhancing their furniture with it. Hardly surprising, since veneers are undoubtedly the most elegant things that wood can offer.

It's as if the essence of a tree has been pressed into fine sheets.

The best of the tree is worked into wafer-thin sheets that enhance the appearance of your DANA door like a second skin. They are warm, vibrant, multifaceted and at the same time particularly economical. Unique items that only nature can produce. We love to play with the structures of veneer and to constantly highlight its beauty in new ways. It is in veneer that the whole breadth of our quality craftsmanship is revealed.

An outstanding product deserves outstanding appreciation.

As a member of the Initiative Edelfurnier we aim to move others to share our enthusiasm and place the importance on this wonderful material that it deserves.

Find out more at edelfurnier.at and discover the wonderful world of our veneer doors from page 55 onwards.

”

We got excellent advice from the start and felt very comfortable. We were shown some possibilities we would never have thought of. Thanks to the great advice we have found the perfect solutions for every room.

Andreas K. | home owner

A BRIGHT FUTURE WITH GLASS AND SLIDING DOOR.

New construction, private residential house

Doors can do so much more than just open and close. They are a design element and problem solver in a wide variety of situations. Andreas K. came to see this when looking for the right doors for his new home.

Customer-specific advice - perfect door solutions.

During their first meeting, the DANA consultant opened up completely new possibilities – from Plus door thickness to a wide variety of models with different functions and advantages. That was how they found the perfect solution for each room: Due to the ceiling height, they opted for a floor-to-ceiling glass swing door in the living area. It brings in more light and makes the room look wider. A sliding door was the optimal choice for the study. In addition to glass swing doors and sliding doors, the interior doors in white also blend in perfectly with the living space and reflect the owners' understated, minimalistic style.

The front door was also a perfect solution: visually elegant and technically state-of-the-art, it signals a warm welcome to visitors.

”

I know a lot of people who have opted for DANA doors when they built their new house or renovated a building – and all of them are completely satisfied. I am impressed by the innovations and functions, but also by the beautiful surfaces.

Andreas K.-W. | home owner

MODERN STYLE WITH NATURAL HIGHLIGHTS.

Private residential house

The door to Mr. K.-W.'s living room opens into modern surroundings. Beautifully natural floors and perfectly matching DANA doors in knotted oak bring warmth and a sophisticated yet rustic flair to the rooms.

Created from the full.

The proud owner didn't need to compromise on functions or appearance. Innovations such as SILENT+ and PROTECT+ give you more peace and quiet in the rooms and offer optimum protection if humidity increases briefly. In terms of design, the black matt handles and door knobs set a beautiful accent. DANAmotion also impressed Andreas K.-W. – with children in the house, the perfect function: No risk of doors flying open and no more loud door slamming.

OPEN. TO.

INSPIRING WORLDS OF STYLE.

Open invitation: [DANA.at](https://www.dana.at)

A room becomes a room for living in, once you have rescued it from anonymity. Designed it according to your wishes, put your own personal stamp on it. And a door opens up so many opportunities to do this: it may be plain, have a rustic look or win you over with its unusual texture or notches and grooves.

We have gathered our doors together for you in inspirational styles. Though of course we have no intention of pigeonholing you. No style can be described in a single word – life is too colourful and varied for that. But maybe it will give you new ideas and even more fun making your selections!

**OPEN. TO. DOORS THAT REALLY
DO ADD BEAUTY TO LIFE.**

A home where life is lived to the full.
Rooms that the whole family can enjoy.
The doors offer an open invitation to
play, romp and enjoy time together. They
also offer an opportunity to retreat into
a peaceful space. High-quality, healthy
materials provide a climate of well-being.

OPEN. TO. DOORS FULL OF CHARACTER.

It may be modern ideas or classic designs, warm wood or cool glass: Those who know their own style perfectly know what goes together. Style is balance and harmony – never blandness. Subtle grooves, beading or textured surfaces give doors that extra something and open up design opportunities that are effective without being intrusive.

Discover the wide range of DANA doors for a home full of elegance and character.

A modern interior space featuring a textured concrete wall. On the left, a large window offers a view of a city. In the center, a dark, low-profile cabinet holds a framed abstract artwork and a white ceramic vase. To the right, a door is set into the wall, featuring a long, vertical, metallic push handle. A white arrow points from the text to this handle. A modern chandelier with three spherical glass shades hangs from the ceiling. The floor is made of light-colored wood, and a dark rug is placed in the foreground.

THE EXTRA-LONG PUSH HANDLE

is simply something different and a perfect match for the industrial flair.

ANYTHING BUT CONVENTIONAL.

SLIDING DOORS

Room for possibilities.

Sliding doors are the grand masters of flexibility: They split rooms without dividing them permanently. Sliding doors are also real space savers – and they are available from DANA in many variations, from all-glass to solid wood, and in a variety of systems.

**FOR MORE
SPACE IN YOUR
LIVINGROOM.**

FRONT

Elegantly hidden.

- Straight-edged covering strip
- For solid and all-glass doors
- Surface for solid doors: choose between anodised stainless steel look, matt black, veneered or varnished
- Surface for all-glass doors: choose between anodised stainless steel look, matt black or matt white
- With DANAmotion system
- Available with casing or without
- Optionally lockable

FRONT: with anodised stainless steel look covering strip and solid door

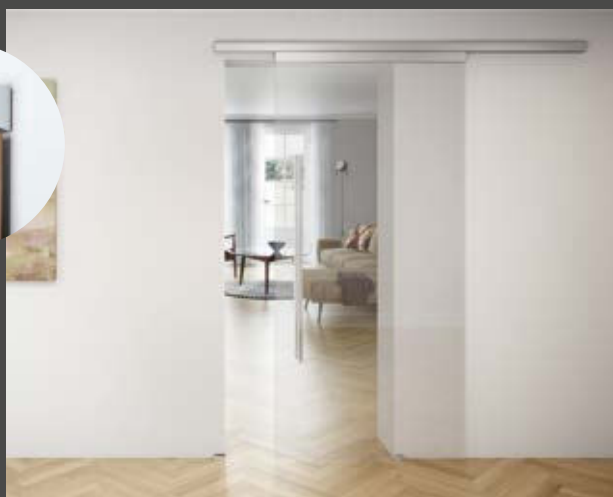

FRONT/GT sliding door system runs in front of the wall

VW-COMPACT

Design wall spacer profile.

- For single-leaf or double-leaf sliding doors
- Narrow design profile
- For solid and all-glass doors
- Surface: EV1 silver
- With DANAmotion system

VW-COMPACT/GT sliding door system runs in front of the wall

INSIDE

For endless free space.

Would you like to have even more creative freedom? **DANA INSIDE**, the sliding door that completely vanishes into the wall, makes it possible.

More details on **p. 31**

INSIDE sliding door system slides inside the wall

SURFACES AT DANA.

Diverse and truly beautiful.

From elegant to rustic, finely textured or with cracks “as nature intended” – choose from a wide range of surfaces the one that perfectly suits your own individual style. Customise every little detail of your interiors just as you like and turn opening your doors into an experience to savour – every time.

Choose from:

- **Solid wood**
- **Wood veneer**
- **Brushed wood veneer – STRUKTURA**
- **Brushed wood veneer with natural cracks – STRUKTURA**
- **Brushed wood veneer, oiled or varnished in white – STRUKTURA**
- **Partially textured varnished doors**
- **Varnished doors**
- **Glass** (from page 106 onwards)

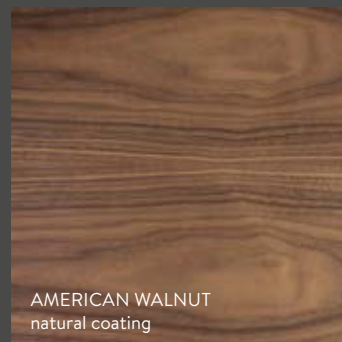

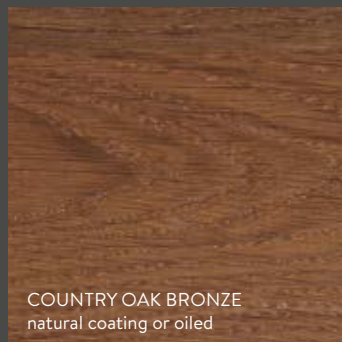

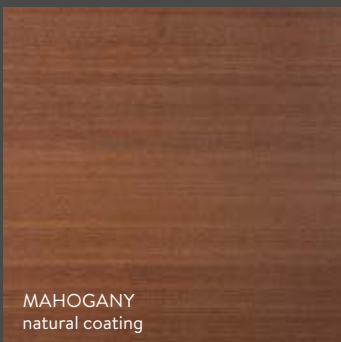

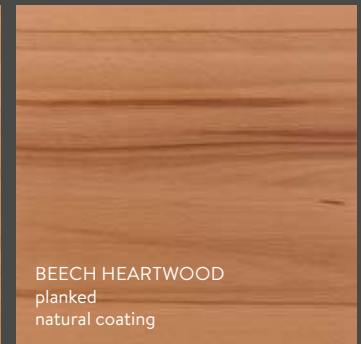

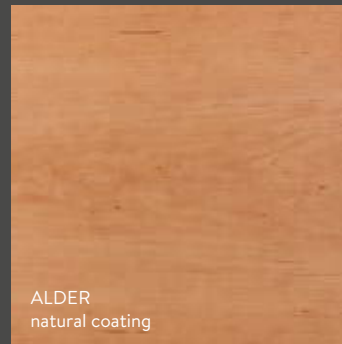

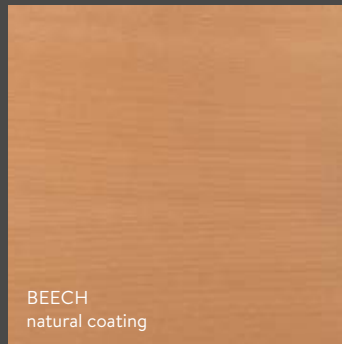

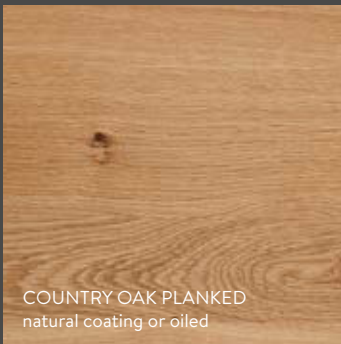

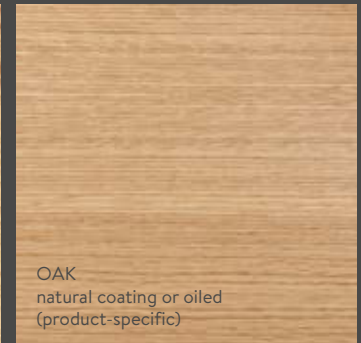

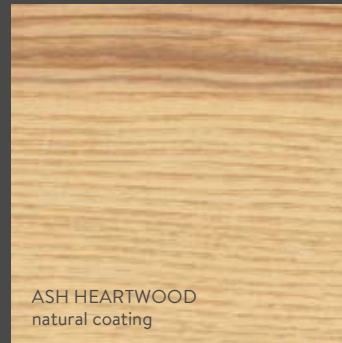

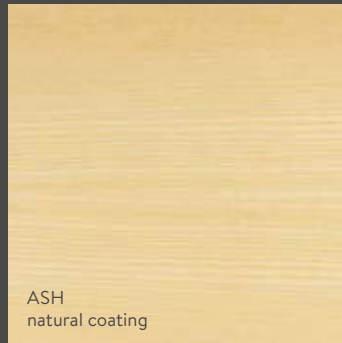

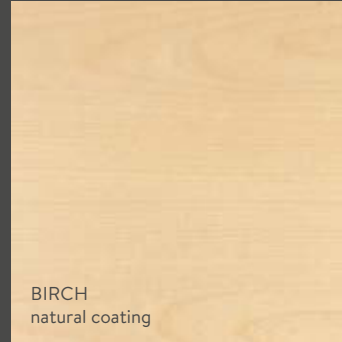

SOLID WOOD

WOOD THROUGH AND THROUGH.

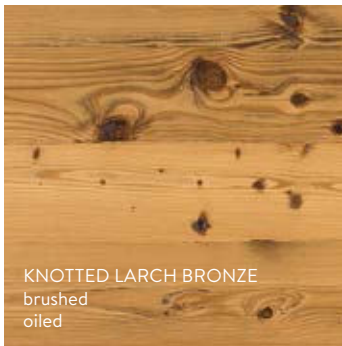

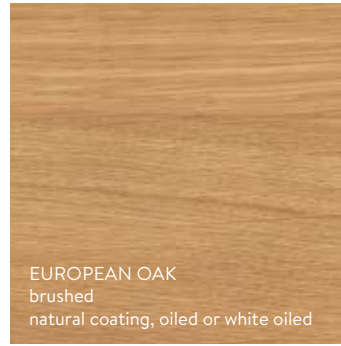

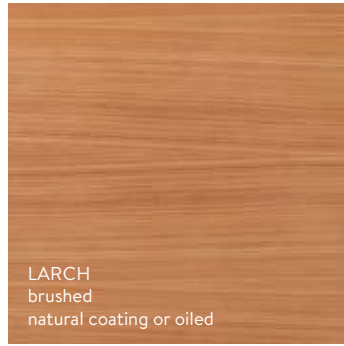

- FSC® and PEFC™ certified
- Traceable origin of the wood in all doors
- High-quality solid wood doors
- With striking knot-holes and grain
- For doors that tell stories

WOOD VENEER

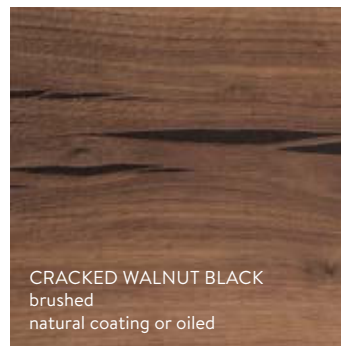

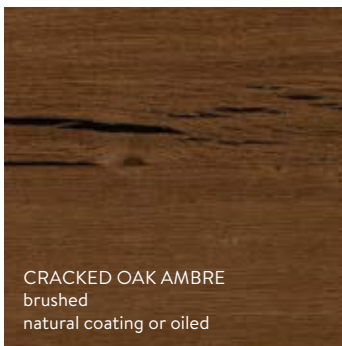

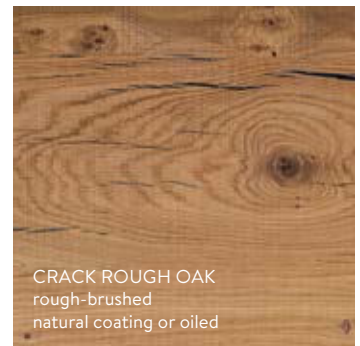

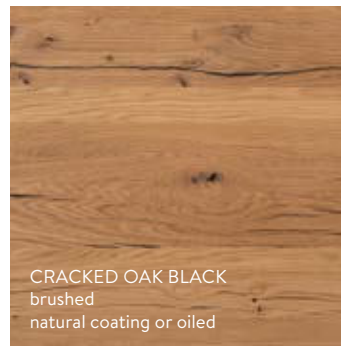

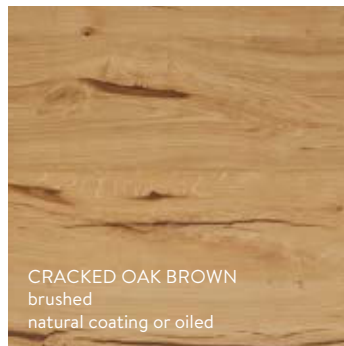

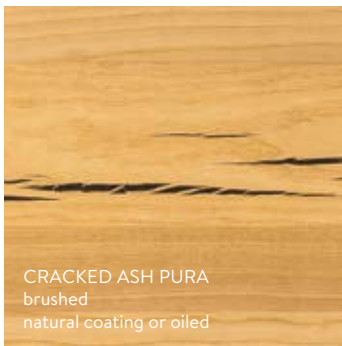

Note: The colours of natural coating finishes differ from those of oiled surfaces.

BRUSHED WOOD VENEER – STRUKTURA

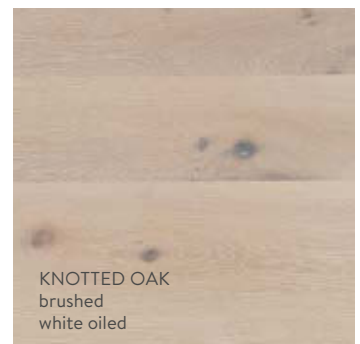

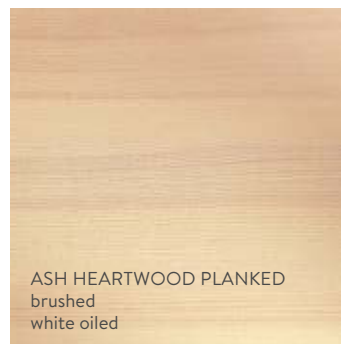

BRUSHED WOOD VENEER WITH NATURAL CRACKS – STRUKTURA

STRUKTURA SURFACES.

- Wood for all five senses
- Brushed for that special texture
- “Crack” finish: natural cracks in the wood in contrasting colours produce stunning effects
- High-grade and elegant
- Oiled surfaces: naturalness that appeals to all five senses

BRUSHED WOOD VENEER, WHITE OILED OR VARNISHED IN WHITE – STRUKTURA

Note: The colours of natural coating finishes differ from those of oiled surfaces.

PARTIALLY TEXTURED VARNISHED DOORS

KONTURA

KONTURA SURFACES.

- A beautiful diversity: details accentuated over parts of the surface create an attractive texture and interesting lighting effects
- Fine, relief-like texture
- Surface larch, partially white varnished

TEXTURA

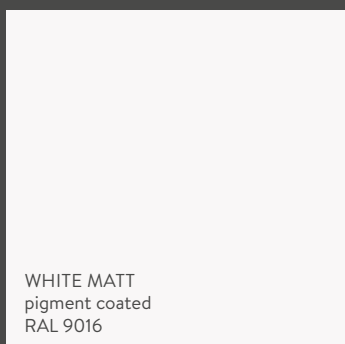

TEXTURA SURFACES.

- Every touch a new experience: with a strongly accentuated texture
- Prominent relief-like surface
- Embossed reed effect

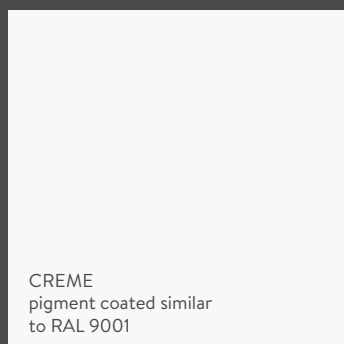

Experience these door designs on page 65.

Check out our finishes

AT ONE OF OUR DANA SHOWROOMS!

**ELEGANT
PERSPECTIVE**

thanks to
float glass.

All-glass door, milk glass

BRIGHT AND CHEERFUL.

Every type of glass has its own advantages. Clear glass, for instance, has its typical greenish tinge, while in milk glass there is almost no hint of green at all. Many DANA all-glass doors, glass cutouts and glass sliding doors are now available in milk glass!

- A modern, exceptional look
- Perfectly suited to all sorts of modern interior styles
- Better at letting light and warmth through – ideal for rooms with no natural light source

FIRST-GLASS DESIGN FROM DANA.

Milk glass for even more light and elegance.

BASIC GLASS TYPES

(see photo on the top of page 106)

- **FLOAT GLASS** (clear glass) or **FLOAT MILK GLASS** (clear glass)
- **SATINATO GLASS** or **MILK GLASS SATINATO**

HOW THE GLASS GETS ITS PATTERN

■ PRINT DESIGN FROSTING

The pattern is melted into the glass at 700 °C and is durable, easy to clean and sparkling.

■ GROOVE CUT

The popular finishing technique for an interesting texture and relief look.

■ LASER TECHNIQUE

The patterns are cut into the glass by laser – the surface stays smooth and is very easy to clean.

MORE THAN A DETAIL.

The frame for your door.

Choosing the door is not the end of the story. Because the frame also makes a decisive impression on the appearance and effect of your DANA door. There are three variants to choose from: **the wood casing**, **the steel casing** or the **panel frame and door frame**. Which frame in which design is the right one depends on the situation and the style that you would like to reflect in your home.

It is best to start thinking about the design and the right frames for your DANA doors during the planning phase. Discover all your options here!

How should the door and casing look?
Discover all possibilities on page 41 –
or choose a frame without casing

KONTEXT DOOR SYSTEM on page 27!

THE WOOD CASING

The classic door frame.

This version covers the raw wall section, so it does not need to be plastered. The doors are installed when the floors have been laid and the walls are finished. You have a wide range of designs to choose from: Door, wall and frame can be flush or stepped. The design of the frame ranges from angular to rounded edges. This way you can define your style down to the last detail.

GEOMETRY OF THE F97 CASING

with rounded edges
(visible width 75 mm)

GEOMETRY OF THE P14 CASING

with clean edges
(visible width 75 mm)

GEOMETRY OF THE STRUKTURA CASING (Z-STRUKTURA)

with sleek edges and brushed
(visible width 75 mm)

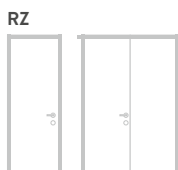

GEOMETRY OF THE J10 CASING

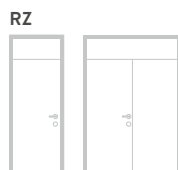

with sleek edges and
narrow visible width (55 mm)

transom and fanlight
up to a clear frame
height of 2,520 mm
(single leaf, double
leaf)

RZH
Ceiling-height frame
without cross rail, with
transom and fanlight
up to a ceiling height
of 2,600 mm (single
leaf, double leaf)

THE STEEL CASING

The strong frame with a discreet look.

A wide range of design options for every situation and all wall types – the steel frame fits everywhere. It enables the implementation of a **very narrow visible width** for a wonderfully elegant, discreet look. Do you need to renovate existing steel frames? With our **renovation profiles** this is done in the twinkling of an eye. The advantage: **there is still plenty of clearance.**

Two-piece corner casing
Retrofit (renovation)

STEEL CASING 24 PROFILE
Corner casing
Retrofit (renovation)

PANEL FRAME, DOOR FRAME & PLANO CASING

A real variety of door frames.

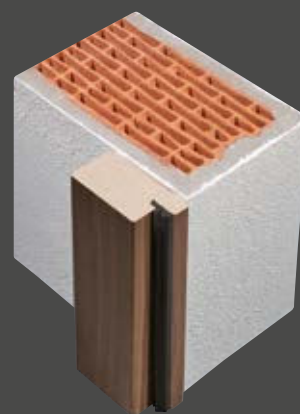

These versions are **installed on the finished plastered wall** – with recessed frame if required. This can be installed **during the construction phase**. This makes it easy to fit the frame later on. Choose **any position in the embrasure**. Panel frames can also be installed **on the wall in front of the embrasure** – to ensure maximum clearance as well as stunning looks.

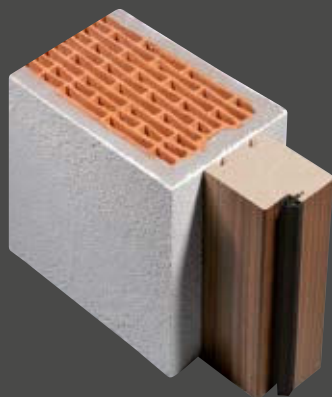

BM 43/65 PANEL FRAME
fitted in the embrasure (any position)

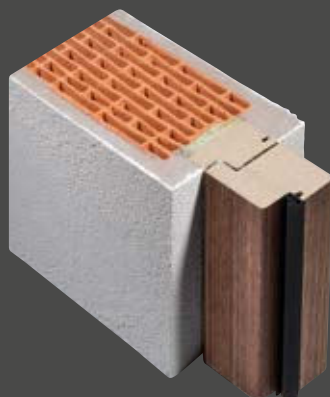

BM 43/65 PANEL FRAME
fitted in the embrasure with subframe

BM 45 PANEL FRAME

ENTRY DOORS BY DANA.

Protecting and welcoming.

The entry door is the gateway to our own highly personal world. It should be an attractive highlight at the entrance to our homes, inviting to visitors while at the same time providing the security and thermal insulation we need. We have created the perfect combination of stylishness and functionality, paying attention to the smallest detail.

- **Outstanding thermal insulation** – suitable for passive houses ($U = 0.74 \text{ W/m}^2\text{K}$)
- **Hard-wearing and easy-to-clean** 2-mm surface layers in many colours and designs – maintenance-free, light- and colourfast
- Door leaf and frame flush-fitting both inside and out
- **Advanced security system** up to class 3 burglary resistant (RC3)
- Noise insulation up to 42 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with two-colour option
- Glass bead for glass inlays, side lights and transom light in elegant stainless steel look – virtually flush-fitting
- Innovative fingerprint system or code buttons for maximum security – can also be extended to all other exterior doors

SIDE ENTRY DOORS.

More than a side issue.

Many houses have more than one entrance, whether these are the classic side entry from the garage or carport or from the front door of a flat into a covered access balcony in apartment blocks. At DANA, we understand the many different requirements, and here too we offer advantages in design, functions and above all security.

- **Hard-wearing and easy-to-clean** surface layers in a wide range of colours and designs
- Optional fire protection
- **Advanced security system** up to class 3 burglary resistant (RC3)
- **Excellent thermal insulation** ($U = 1.1 \text{ W/m}^2\text{K}$)
- Noise insulation up to 43 dB or optionally 45 dB
- Extremely hard-wearing and moisture-resistant cast resin edge – with two-colour option
- Available with innovative fingerprint system or code buttons as an option

For more information on entry doors and side entry doors, see the

APARTMENT ENTRANCE

as a Kontext door.

ENTRANCE DOORS FOR FLATS WITH SECURITY SYSTEM.

More security at home.

DANA also attaches great importance to the subject of entrance doors for flats since their occupants also want to have the feeling that they are safe and secure in their homes and give their visitors a stylish welcome.

- **Advanced security system** up to class 3 burglary resistant (RC3)
- Various **models to choose from** – find the right door for your needs
- Available with glass cutouts, side lights and transom as options. Safety glass used according to the class of burglary resistance chosen
- Available grooved or as Modul or Kontext
- Complies with **climate class C**
- Available with innovative fingerprint system as an option for maximum security

For more information on entrance doors for flats, see the

APARTMENT ENTRY DOOR FOLDER

ASK YOUR
DANA SALES PARTNER!

PROPER CARE.

The DANA oil care and basic set.

We want you to get the best out of your DANA doors for a long time and enjoy the look of them every day. That's why we also offer you the care products you need.

Because we know precisely what each door needs, we have put together a basic set for your interior doors and an oil care set for oiled surfaces (e.g. STRUKTURA).

Savour the elegance of your DANA doors – for years to come!

DANA showroom in Salzburg

WE LOOK FORWARD
TO YOUR VISIT!

OUR TIP:

Please make sure you arrange an appointment in advance. Then we'll be able to devote more time to you. More at dana.at/schauraum

OPEN. TO. NEW VIEWS AND INSIGHTS.

Our book of doors has shown you the world of DANA. But there is so much more to discover and experience.

Be amazed and take advantage of the professional guidance offered by DANA. If you're building a house you should come and see us at the planning stage. Because it's been shown time and time again: Only if you are aware of all the possibilities and think about your doors early on will you get the most out of every room.

Whether in person in our showrooms or online:
We look forward to your visit.
