WELCOME TO HARO

Company management in
the fourth and fifth generations:
Peter Hamberger and
Dr. Peter M. Hamberger

Founded in 1866 as a family business and with a tradition of 150 years, long-term thinking is an essential part of our company's culture. Sustainable products and business practices are natural for us, just like our innovative power and our striving to create beautifully designed flooring. With our Design Floors DISANO by HARO, we have consciously chosen a different path: unlike conventional PVC or vinyl floors, they are completely free from PVC and plasticisers and have been awarded the Blue Angel eco label. DISANO by HARO stands for trendy, tasteful interior designs in a healthy home. Let yourself be inspired by our current range with its large selection of products that cannot only be used in living areas, but even in rooms which can sometimes get damp, such as kitchens or bathrooms. Enjoy selecting your DISANO dream floor for a healthy living.

DISANO by HARO *EXPLANATION*

THE DESIGN FLOOR FOR HEALTHY LIVING. 100% FREE FROM PVC AND PLASTICISERS.

In recent years, a new type of flooring has become established, which is commonly called Design Flooring. It usually refers to floors that are made of plastic. The Design Floors DISANO by HARO are unlike other plastic floors, as they do not contain PVC, plasticisers and phtalates, which is why they contribute to a healthy living environment. This is why, in contrast to conventional design floors, they have also been awarded the Blue Angel certificate for products that pose no health risk.

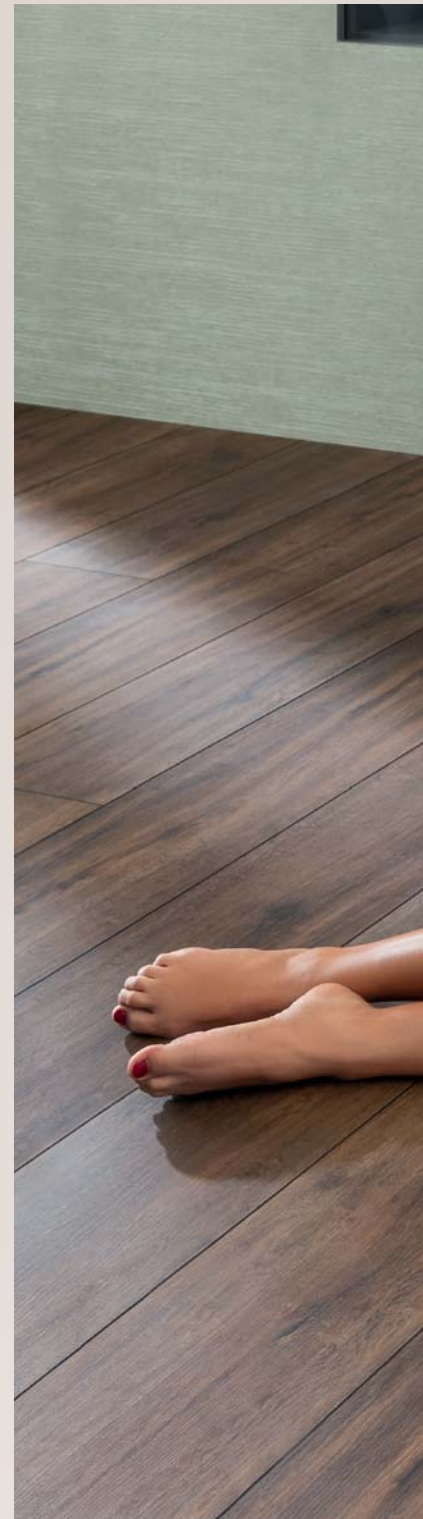

100 % FREE
from PVC and
plasticisers

DISANO by HARO *SPECIAL FEATURES*

A HEALTHY LIVING ENVIRONMENT OF THE HIGHEST QUALITY.

DISANO Design Floors by HARO are entirely free from plasticisers, PVC and phthalates. This is one of their unbeatable advantages to conventional PVC flooring – which is sold under the name vinyl flooring – that contains harmful plasticisers. Our philosophy concerning healthy living is incompatible with the use of these substances that pose a threat to our health. This is why DISANO Design Floors by HARO are certified with the Blue Angel and the Eco Label. Our floors guarantee a healthy home – including the bathroom, kitchen, and any other damp rooms.

100% FREE
from PVC and
plasticisers

DISANO by HARO PROPERTIES

SOFT, WARM TO THE TOUCH, EASY TO CLEAN, DURABLE AND QUIET

DISANO by HARO Design Floors have many positive characteristics: Acclaimed floors like these are not only free from harmful substances – they are also particularly pleasant in everyday use.

DISANO Design Floors by HARO are of exceptionally high quality: Due to the high quality of the materials and their processing, they ensure lasting joy for many years – as beautiful as on the very first day. This, too, is part of sustainable thinking.

WARM TO THE TOUCH

The use of carefully selected, healthy materials - structured in multiple layers – is what makes DISANO flooring so warm and pleasant to the touch.

NOW ALSO FOR DAMP ROOMS

There are now two waterproof DISANO variants (Saphir and Project) and two with moisture protection (Smart Aqua and Classic Aqua), all of which are approved for use in damp rooms (including the bathroom).

EASY TO CLEAN

With our clean & green care series, the regular, efficient and gentle care of DISANO Design Floors is child's play.

DURABLE

DISANO by HARO is incredibly durable, even when exposed to intensive wear and tear, for example in entry areas or when used in commercial applications.

COMFORTABLE

The SilentSense surface creates a soft step and a feeling that is warm to the touch. Thanks to the additional ElastoTec layer, DISANO Classic Aqua provides a pleasantly soft walking feeling and even more elasticity. It protects the floor from dents and penetrating moisture while ensuring improved stability.

100 % FREE
from PVC and
plasticisers

DISANO by HARO

THE DIFFERENCE

SUPERIOR IN EVERY WAY

DISANO Design Floors by HARO have decisive benefits over conventional PVC floors that contain plasticisers: they are not only better when it comes to creating a healthy living environment, they are also so superior due to their technical advantages and properties of use.

In addition to discolouration, embrittlement, and cold flow, DISANO by HARO Design Floors are characterised by a structure that has a particularly high level of dimensional stability. Here, the rigid coreboard plays a decisive role (with the exception of the DISANO Project). This makes the DISANO by HARO Design Floor particularly resistant to temperature changes and makes it especially easy and quick to install – even if the subfloor is slightly uneven.

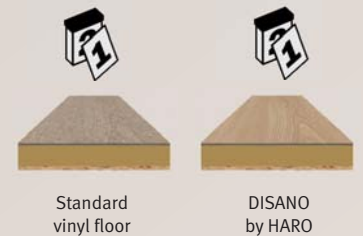

COLOUR CHANGES

The colours of vinyl floors can change significantly under the influence of UV light. DISANO by HARO keeps its colour throughout its entire lifetime.

EMBRITTLING

The plasticisers in vinyl floors lose their effectiveness in the course of time. This can cause the floors to become stiff and brittle.

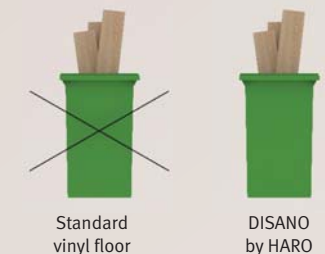

DIMENSIONAL STABILITY

Vinyl floors react to warmth, e.g. through exposure to sunlight, by bending. DISANO by HARO, on the other hand, remains even due to the rigid core board.

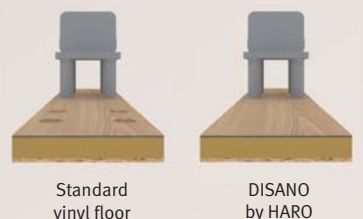

DISPOSAL

Vinyl floors (e.g. residues or trimmings after installation) must not be disposed of as household waste. DISANO by HARO can be disposed of in household waste without worries.

COLD FLOW

Cold flow is the phenomenon in which furniture and chair legs cause permanent dents in vinyl flooring. DISANO by HARO, by contrast, is pressure-resistant and these dents never occur.

100 % FREE
from PVC and
plasticisers

DISANO by HARO *CLEANING AND MAINTENANCE*

THE DESIGN FLOOR DISANO by HARO IS EASY TO CLEAN AND MAINTAIN

Our Design Floor DISANO by HARO is very easy to maintain, while preserving its timeless beauty. Dry cleaning using a vacuum cleaner or a broom is all that is necessary. If damp cleaning is unavoidable, we recommend the clean & green 'natural' cleaner for the regular cleaning. Floors that are subject to heavy traffic are easy to maintain with the 'clean & green active' cleaner. To freshen up the appearance of the design floor and to keep it beautiful for many years to come, we recommend the 'aqua shield' floor care product. All products are eco-friendly and specially designed for the DISANO by HARO Design Floors.

DESIGN FLOORS QUICKFINDER SERIES

COMFORT THROUGHOUT THE HOME.

The Design Floors DISANO by HARO are ideal for all rooms. With the five different series that are available, you will always find the right floor, depending on the visual impression and the technical requirements such as height, load capacity or application area.

"IT'S GREAT THAT I CAN MAKE EVERY ROOM IN THE HOUSE SO COMFORTABLE AND WARM, WHILE ENSURING A HEALTHY LIVING ENVIRONMENT."

DISANO Saphir
The durable and waterproof 4.5 mm-thick full-plastic design floor with waterproof coreboard.

DISANO Life
The easy multilayer design floor with a thickness of 8 mm in a trendy and room-enlarging XL format.

Page 62

DESIGN FLOORS *BUYING GUIDE* *WATER/MOISTURE* *PROTECTION*

WATERPROOF OR WITH MOISTURE PROTECTION

If a DISANO Design Floor by HARO is waterproof, you can even submerge it in water without anything happening to it – waterproof floors are made of solid plastic.

If a DISANO Design Floor by HARO has moisture protection, it can withstand standing tap water for up to 4 hours – then the water must be removed.

Waterproof

DISANO SAPHIR AND DISANO PROJECT

- Approved for installation in bathrooms, kitchens and other damp rooms.
- Extremely hard-wearing thanks to the waterproof full-plastic construction (DISANO Saphir with rigid coreboard, DISANO Project with ElastoTec layer)
- Low profile
- Ideal for renovations
- Harmonises perfectly with any kind of underfloor heating or underfloor cooling.

Moisture protection

DISANO CLASSIC AQUA AND SMARTAQUA

- Reliable moisture protection thanks to AquaReject coreboard
- Especially quiet thanks to integrated cork insulation
- With glue-down installation, it is also suitable for bathrooms
- Perfect for underfloor heating or underfloor cooling

"EVERY STEP ON MY NEW DISANO DESIGN FLOOR
IN THE BATHROOM IS A BLESSING – ESPECIALLY
WITH BARE FEET."

DESIGN FLOORS QUICKFINDER FORMATS

THE RIGHT FORMAT FOR EVERY ROOM

To make a room really impressive, you need the right board format. With the Design Floor DISANO by HARO, you have the choice of six different formats:

From extra long for a spacious room impression in living rooms, to the classic board format for smaller areas like bathrooms. Even an appealing alternative to tiles can be found in the DISANO range - waterproof or with moisture protection.

"WITH THE RIGHT FORMAT, I CAN
CREATE A REALLY IMPRESSIVE
AMBIENCE IN MY HOME."

DISANO SAPHIR

TECHNOLOGY, RANGE

235 mm (9 1/4")

1282 mm
(50 15/32")

- 1 The SilentSense surface with its authentic wood look is elastic, soft and comfortably warm. It protects the floor, makes it durable and is easy to clean. The decorative layer gives the product an authentic wood look.
- 2 The dimensionally stable full-plastic coreboard is a rigid coreboard that is free from PVC and plasticisers. This makes even slight irregularities in the subfloor invisible. This means that DISANO Saphir is completely water-resistant – even with standing water – and extremely hard-wearing. In addition, the special material composition of the coreboard ensures high elasticity and thus a pleasantly soft feeling.

Board dimensions	4.5 x 235 x 1282 mm / 3/16" x 9 1/4" x 50 15/32" (thickness x width x length)
Content/pack	10 pieces/pack = 3.01 m ²
Weight	5.28 kg/m ²
Level of use (acc. to EN 685)	23/33
	For high-traffic residential and commercial applications
Warranty (according to warranty terms)	25 years in residential applications 5 years in commercial applications
Connection/Installation system	Top Connect Glueless installation with Silent Grip insulation underlay ID no. 409 272.
Suitable for damp rooms	Suitable for installation in damp rooms (W0-1 according to DIN 18534). For use in damp areas, floors must be glued down (with HARO Flexible Glue ID no. 410 563).
Suitable for underfloor heating/cooling	Thermal resistance 0.0317 m ² K/W
Cleaning/Maintenance	Dirt-repelling surface, simply mop the floor with a slightly damp cloth, brush off or vacuum. Please follow the care instructions.
Fire protection class	D _{f1} -s2 (normally flammable)/with glue-down installation C _{f1} -s2

Insulation underlay Silent Grip

High-quality sound insulation underlay on the basis of natural mineral fillers and with slip-resistant grip surface. Specially designed for the floating installation of DISANO Saphir. Also suitable for installation over underfloor heating and cooling.

In the case of glue-down installation, please note the prescribed moisture values of the subfloor.

DID YOU KNOW?

One feature of the DISANO Design Floors by HARO is their high abrasion resistance. Ideal for rooms with a high level of footfall, such as corridors. And if you want to move a chair, for example, you can do it without any problems. With the HARO Design Floor DISANO, there are no unpleasant dents from chair legs.

DISANO CLASSIC AQUA TECHNOLOGY, RANGE

- 1 The SilentSense surface with its authentic wood look is elastic, soft and comfortably warm. It protects the floor, provides it with durability and is easy to clean.
- 2 The waterproof ElastoTec layer is particularly impact and shock resistant. Not only does it protect the floor from moisture, it also optimises the stability of the boards and ensures a pleasant, elastic walking feeling thanks to the composition of the materials.
- 3 The PVC-free, dimensionally stable AquaReject coreboard is a rigid coreboard based on natural materials. This makes even slight irregularities in the subfloor invisible. As it has the highest degree of resistance against swelling, it is also approved for use in damp rooms (W0-1 in accordance with DIN18534), such as domestic bathrooms. Due to its special impregnation, the coreboard can withstand standing tap water for up to 4 hours.
- 4 High-density cork insulation layer for reduction of room and footfall sound, as well as optimised walking comfort. No additional insulation underlay required.

Board dimensions	9.3 x 235 x 2035 mm / 3/8" x 9 1/4" x 80 1/8" (thickness x width x length)

DISANO LIFE

TECHNOLOGY, RANGE

- 1 The SilentSense surface with its authentic wood look is elastic, soft and comfortably warm. It protects the floor, provides it with durability and is easy to clean.
- 2 The PVC-free, dimensionally stable HydroResist coreboard is a rigid coreboard based on natural materials. This makes even slight irregularities in the subfloor invisible. Due to its high degree of resistance against swelling, it is particularly resistant against moisture compared to standard coreboards out of wood materials.
- 3 High-density cork insulation layer for reduction of room and footfall sound, as well as optimised walking comfort. No additional insulation underlay required.

Board dimensions	8 x 235 x 1800 mm / 5/16" x 9 1/4" x 70 7/8" (thickness x width x length)
Content/carton	8 pcs. = 3.38 m ²
Weight	7.00 kg/m ²
Level of use (acc. to EN 685)	23/33
	For high-traffic residential and commercial applications
Warranty (according to warranty terms)	20 years in residential applications 5 years in commercial applications
Connection/Installation system	Top Connect, glueless installation
Suitable for underfloor heating/cooling	Thermal resistance 0.057 m ² K/W
Cleaning/Maintenance	Dirt-repellent surface, simply mop the floor with a slightly damp cloth, brush off or vacuum. Please follow the care instructions.
Fire protection classification	D _{fl} -s1 (normally inflammable)

HARO ACCESSORIES

HARO ACCESSORIES ALWAYS MATCH. HARO not only offers the beautiful, high-quality DISANO Design Floors by HARO that are easy to clean – we also offer the matching accessories for your design floor. Manufactured in the same quality and perfectly matched to the look and characteristics of your DISANO Design Floor by HARO – for a better feeling when you restyle your home. From skirtings to insulation underlays – we offer a wide range of accessories for every requirement from a single source.

SKIRTINGS/MOULDINGS

Stick-on skirtings
Solid wood core
laminate cover, resistant to water
19 x 58 mm (3/4" x 2 9/32"), Pine Nordica

"THE RIGHT SKIRTINGS GIVE THE ROOM
BEAUTIFUL CONTOURS."

The well-matched skirtings in the DISANO Design Floor range allow you to create elegant transitions between floors and walls. Skirtings are also available in waterproof variants that match the waterproof floors or floors with moisture protection. The skirtings are matched precisely to your desired floor, both visually and technically, and skilfully round off the overall aesthetic impression. Choose between skirtings in the shade of the floor or, for instance, white to create a deliberate contrast. Naturally, all skirtings are available with moisture protection.

19 x 58 mm (3/4" x 2 9/32")

TRANSITION MOULDINGS

With the right transition mouldings, you can harmoniously combine different DISANO variants or even different floor coverings. The construction of the mouldings allows a different height to be balanced when installing them between two different floors – this creates discreet transitions that skilfully join two floor surfaces.

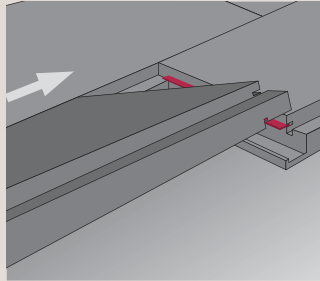

INSTALLATION

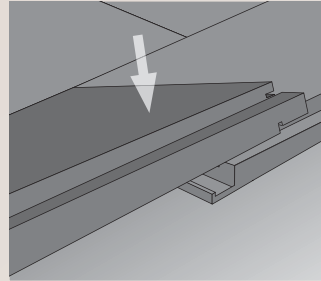

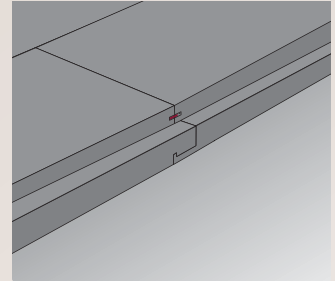

5G Fold Down locking system

ANGLE IN

PRESS DOWN

DONE

PROBABLY THE WORLD'S EASIEST
INSTALLATION SYSTEM:
TOP CONNECT

All those who have always wanted to install their own design floor but have never dared to can now get the real hands-on experience. With Top Connect, which is possibly the world's easiest installation system,

the most beautiful floor designs can be created easily and with extraordinary stability. The boards are angled in at the long sides and interlocked at the short sides with a small amount of pressure.

The floor fits perfectly and is ready to be "lived on" immediately. And it can be disassembled just as easily if you move home.

UNDERFLOOR HEATING/COOLING

Due to the multilayer construction of the DISANO Design Floors, they are dimensionally stable even under thermal stress and are therefore ideal for installation on underfloor heating.

CARE

LASTING BEAUTY AND PERFECT PROTECTION

With the clean & green cleaning and care products, the care and maintenance of DISANO Design Floors by HARO is simple and safe. They are specially adapted to DISANO Floors by HARO and ensure that the floors are given gentle, yet intense care with every application.

CARE FOR FLOORS IN MEDIUM-TRAFFIC LIVING AREAS

clean & green natural

Our clean & green natural intensive cleaner makes cleaning and maintaining your DISANO Floor in areas with a medium grade of wear and tear particularly easy and efficient.

CARE FOR FLOORS IN HEAVY-TRAFFIC AREAS AND COMMERCIAL APPLICATIONS

clean & green active

For the deep cleaning of heavy-traffic design flooring and resilient floor coverings in areas with a high degree of wear and tear.

clean & green Aqua Shield

For lasting refurbishment and maintenance of your Design Floor.

"I'M DELIGHTED AT HOW QUICK AND EASY IT IS TO CLEAN MY DISANO DESIGN FLOOR."

www.blauer-engel.de/uz12a

CERTIFICATION

Not only does the DISANO Design Floor by HARO stand out because it is entirely free from PVC and plasticisers, it also sets standards with its robust and safe properties. The numerous certificates we have received show that for us quality is more than just a promise. They prove that we value diligence and transparency highly when it comes to product quality, a healthy living environment, and our production processes.

HARO WARRANTY

In addition to the statutory warranty terms, HARO also provides additional warranties for various product groups. Please note the respective warranty conditions.

BLUE ANGEL ECO LABEL

The Blue Angel certifies the environmental compatibility of our products.

VOC-Label

The French VOC label certifies that the emissions of DISANO by HARO are completely non-hazardous.

MADE IN GERMANY

Our quality floors are of the highest-quality German workmanship.

ECO INSTITUTE

The UL ECO-INSTITUT certification proves that DISANO by HARO meets the strictest regulations regarding the emission of harmful substances.

ISO 50001

Since 1995, we have been certified according to DIN EN ISO 9001:2008. This ensures consistent product quality.

ISO 14001

DIN EN ISO 14001: 2004 stands for active environmental management. Since 1998, we have been the recipient of the Bavarian Quality Award and since 2002, the owner of the PEFC seal.

ISO 50001

HARO's energy management is certified according to ISO 50001: 2013.

CE

The CE label stands for compliance with all European safety and health directives

MMFA

Hamberger Flooring GmbH & Co. KG is a founding member of the Multilayer Modular Flooring Association.

PRODUCT VARIETY FROM HARO

In its diversity, wood is a fascinating material. We stand by our passion for wood, using its natural appeal, powerful ambience, and diverse characteristics in our products to create the foundation for stylish living.

HARO PARQUET
Our Parquet Floors are made exclusively of wood of the highest quality. With a HARO Parquet, you can lastingly enhance your rooms and enjoy the highest level of living comfort for many years to come.

HARO LAMINATE FLOORS
Laminate Floors are made of up to 90 percent wood. This means that the positive properties of real wood floors are combined with the technical benefits of artificially produced surfaces.

HARO INTERIOR
With HARO Interior, you can also use the natural charisma of precious wood for wall design and panelling on the sides of the stairs. As a perfect eye-catcher, you will also find our "HARO Table" here.

PARKETT MANUFAKTUR BY HARO
What emerges here from masterful craftsmanship are floors that are unsurpassed when it comes to elegance and uniqueness. With real workmanship, the most precious woods are processed into top class parquet floors.

CORK FLOORS
For decades, cork flooring was found almost exclusively in children's rooms and day-care centres. This was owed to its underfoot warmth and soft surface. We have made it attractive as a true alternative for stylish living.

DISANO – THE DESIGN FLOOR FOR HEALTHY LIVING
