HARO Interior

Naturalness is what counts when it comes to the design of modern rooms that radiate a sense of comfort. HARO Interior offers attractive possibilities for using the unique charisma of wood not only for floors, but also for wall design, the panelling of stairs and even for your living room table.

Natural beauty as a room concept

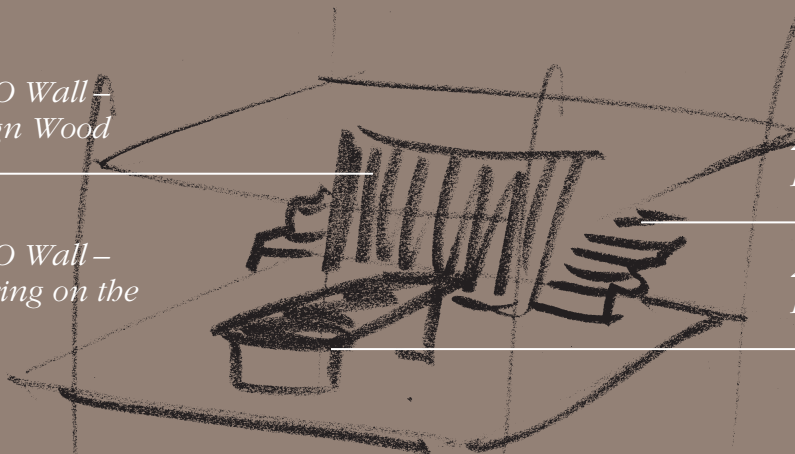

HARO Interior is your complete system for interior design with precious wood: With HARO Wall for wall design, HARO Stairs for the integration of your staircase into the floor concept, and a characteristic HARO Table made of parquet, you create living spaces full of harmony, elegance and charm.

Wall

Design Wood

The current trends in interior design revolve around naturalness and clear room concepts with large windows. Partial or complete wall designs with wooden elements fit perfectly. They create counterpoints to the room concept or emphasise it in a subtle way. This completely new living experience is underlined by the noble, selected woods, the striking texture of the design elements and their matt oiled surfaces.

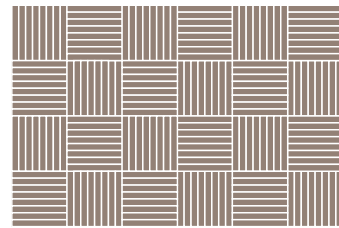

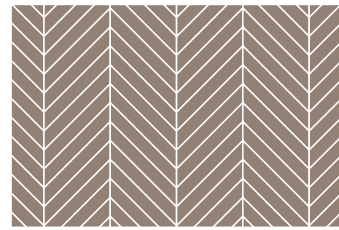

HARO Wall – Design Nevada
OAK RIVER
heavy brushed oiled

Create accents in your home and use the **NATURALNESS** of brushed wood surfaces for an extravagant interior design.

No matter which flooring you have, you can create stylish accents with a partial wall covering, especially in large rooms. In this case, the Oak River wall panelling in the Nevada design corresponds with

the exceptionally calm CELENIO. A feeling of spaciousness with gentle contrasts and a pure natural radiance is created.

OPEN INTERIOR CONCEPTS with clear contours develop a different character with HARO elements.

Another possible application of HARO Wall is the cladding of supporting columns and other architectural details. The dominance of austere architecture is reduced by the natural essence of the wood elements, which are harmoniously integrated into the room.

HARO Wall – Design Nevada
OAK RIVER
heavy brushed oiled

HARO Wall – Design Patagonia
SMOKED OAK RIVER
heavy brushed oiled

Wood on the wall creates **EYE-CATCHERS IN THE ROOM,** spreading a distinctive sense of warmth and comfort.

The distinctive Patagonia Smoked Oak River creates a "room in a room" and divides the space into two interrelated areas in correspondence with CELENIO in the main room. This enhances the already impressive spacious effect.

HARO Wall – Design Patagonia
THERMO OAK LAKE

With HARO Wall you can create **ROOM EXPERIENCES** that surround you with a feeling of comfort and create a unique ambience.

HARO Wall – Design Patagonia
AMERICAN WALNUT RIVER
brushed oiled

The perfect mix of different materials creates oases of well-being for guests. The aesthetic strengths of the American Walnut with its

intense, dark brown shades are played out in full with the lavish Patagonia design, creating a calm and classy room ambience.

HARO Wall: Design Wood System

With the elements of design wood on the wall that can be used immediately, you can even install larger wall surfaces in a short time. Before the actual installation, it is important to examine and prepare the surface that is going to be designed. For optimum adhesion results, the wall should be as even as possible and free of residues.

INSTALLATION

- All you need is a tape measure, scale, saw, spirit-level water scale and pencil.
- Adhesive strips on the back of the element make it ready for immediate use after removal of the protective film.
- The special adhesive is attached in such a way that each element can be glued seamlessly.

FIXATION

- For an additional fixation of the HARO Wall Elements, the HARO mounting adhesive is needed.
- The mounting adhesive provides a firm hold.

PLEASE NOTE

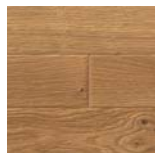

- Wood is a natural product.
- Penetration of moisture must be avoided.
- Please read the detailed information in the installation instructions.

Design Wood Range

DESIGN NEVADA

For a fascinating 3D look, the filigree elements of the Nevada design in the Oak River wood type are available in the mixed thicknesses 3.7/4.7/7.3 mm. The format of 62 x 496 millimetres is particularly suitable for designing small surfaces with impressive textures or for partial installation on walls.

HARO Wall

Flooring on the wall

Wood on the wall is nothing new, but pure, genuine materials are becoming increasingly important in modern interior design concepts. Concrete flooring, brick walls, rough plaster – original naturalness determines the interior design in trendy rooms. The almost logical consequence is that floor coverings are en vogue on walls, too. With HARO Wall, we have developed a system with which our floor coverings from the HARO PARQUET 4000 Series with 3-layer structure, HARO TRITTY Laminate Floor with a thickness of 8 mm, and CELENIO by HARO can be used as wall panels. This gives you the possibility to easily and tastefully create an extraordinary room experience using your favourite floor covering.

Stylish **WALL DESIGN** in countless variations:
The HARO Wall concept "flooring on the wall"
makes this possible.

brushed

Whether you choose the natural effect of a parquet floor, the trendy appearance of a laminate floor or a structural design with CELENIO: The foundation of your "flooring on

the wall" is a rail system, which you can equip with the respective material just as easily and quickly as you know it from the installation of the HARO floor coverings.

A perfect room setting is created by the skilful mix of different materials for floors and walls.

HARO Wall: Flooring on the wall Specifications

HARO Wall creates floor-to-wall compositions, which consciously play with the selected materials to create a unique ambience. The deliberate use of completely different surfaces for the wall and the floor covering, for example, gives it a contrasting character. Rooms designed in this way benefit from an aesthetic that blurs boundaries and still sets strong accents.

The corresponding installation instructions as well as the respective installation video can be found at www.haro.com/montage (product range Accessories) or directly via this QR code.

HARO *Table*

Unique and classy

Precious wood tables from original HARO Parquet matching your HARO Parquet Floor or deliberately contrasting – a completely new development from Germany's leading parquet manufacturer that seems natural. Someone who knows what a stylish parquet floor has to look like also knows which table would match. This not only makes it possible to design the room in a contemporary fashion, but it also enables the interior design to be perfectly matched in order to achieve a harmonious and comfortable home or to set unprecedented accents through the contrast with the table.

Because **A TABLE THAT MATCHES** the floor is a much clearer statement than one that has been randomly chosen.

AN EYE-CATCHER WITH PERSONALITY

You can choose from three classic dining table dimensions: 180 x 85 cm, 200 x 85 cm or 260 x 100 cm. Combine it with either the sophisticated black steel look or a stylish stainless steel frame – and your HARO Table is ready. A table as it should be. For the moments in life that really count.

Its strength lies in the detail: A HARO table is always unique. As wood is a natural product, no two parquet planks are the same. The table top is made of original HARO Parquet Flooring and is therefore unique. We offer only the finest parquet for the table top. By selecting the same parquet as on the floor, you can reinforce the visual impression of the room. Or you can deliberately create a contrast that immediately catches the eye.

HARO

Stairs

In-depth details

If you choose a high-quality HARO floor covering, such as a Parquet or Laminate floor, or the Design floor DISANO, you will naturally want the perfect interior design for your home. For this reason, we have developed HARO Stairs. It allows you to integrate a staircase into your room concept. By using the same covering as on the floor, a coherent, harmonious and elegant room impression can be created. On the other hand, a staircase that is in contrast to the floor but made of the same material elevates the staircase to the level of a design object.

HARO PARQUET
Plank 1-Strip 4V

Staircases become an **EYE-CATCHER** and blend into the interior design of a room.

HARO Stairs includes everything you need for the elegant panelling of your open staircase to make the room harmonious. The prefabricated stair nosings and side panels are available for our parquet floors as well as for laminate floors and DISANO design floors. With these accessories, you can create the perfect design for your home.

The Company

We are a family business with a tradition dating back to 1866. Back then, Paul Hamberger laid the cornerstone of today's internationally successful company with a matchmaking factory, which he opened near Rosenheim. From the outset, wood has been the central element of the company's success. Even today it is the expertise in wood processing and the passion for wood that maintain the extremely high level of innovation at Hamberger. This has made Hamberger

In the fourth and fifth generations, the family business Hamberger is today led by Peter Hamberger and Dr. Peter M. Hamberger. Alongside awareness concerning tradition, responsibility and entrepreneurial behaviour, it is above all the great innovative power that has made the HARO brand Germany's leading manufacturers of parquet. This has made it possible to create the new division HARO Interior, in order to make your home more comfortable and stylish with a variety of innovations and trendy features.

products – especially those of the premium brand HARO – one of the world's most successful parquet brands in many countries. HARO products are made from first-class raw materials, which are produced with the greatest possible care in our own factories. The responsible management of resources and active environmental protection have always been one of the company's leading maxims.

Product variety from HARO

In its diversity, wood is a fascinating material. We stand by our passion for wood and in our products for the home use its natural appeal, powerful ambience and diverse properties as the basis for stylish living.

HARO PARQUET

Our Parquet Floors are made exclusively of the highest quality wood. With a HARO Parquet, you can lastingly enhance your rooms and enjoy the highest level of living comfort for many years.

HARO LAMINATE FLOOR

Laminate floors are made of up to 90 percent wood. Therefore, the positive properties of real wood floors are combined with the technical benefits of artificially produced surfaces.

DISANO by HARO

DISANO is not only the perfect solution for modern and vibrant living. DISANO also creates a 100% healthy living environment and is produced without the use of any plasticisers or other environmentally hazardous substances.

PARKETTMANUFAKTUR by HARO

What emerges here from masterful craftsmanship are floors that cannot be surpassed when it comes to noblesse and uniqueness. With real workmanship, the most precious woods are processed into top class parquet floors.

CELENIO by HARO

Our passion for wood combined with our eagerness to find extraordinary solutions have led to the unique innovation CELENIO: the combination of the optics of stone with the warmth of wood.

CORK FLOORS

For decades, cork flooring was found almost exclusively in children's rooms and day-care centres. This was owed to its underfoot warmth and soft surface. We have made it attractive as a real alternative for stylish living.
